What should I do if I have an anthrax threat at my worksite?

The actions that will constitute an appropriate response for an anthrax threat will depend on how the threat was discovered and the credibility of a threat at your facility (for example, which zone your facility fits into on the [Anthrax Risk Reduction Matrix](#)).

- ✦ [Discovery of Possible Contamination or Threat](#)
- ✦ [Evaluate the Credibility of the Threat](#)
- ✦ [Determine What Actions You Should Take](#)

Discovery of Possible Contamination or Threat

Discovery of anthrax may occur in several ways:

- ✦ Physical evidence (such as a suspicious package containing powder),
- ✦ Epidemiological or medical observations (such as individual cases of anthrax), or
- ✦ Unsubstantiated threat (such as a phone call or letter stating that anthrax has been used).

The following links provide additional information about identifying suspicious packages:

- ✦ [Centers for Disease Control and Prevention \(CDC\) Health Advisory, Updated Information About How To Recognize and Handle a Suspicious Package or Envelope, Distributed via the Health Alert Network October 31, 2001, CDCHAN-00050-01-10-31-ADV-N.](#)
- ✦ [Federal Bureau of Investigation \(FBI\) Advisory Poster, If you receive a suspicious letter or package, what should you do?, General Information Bulletin 2000-3.](#)
- ✦ [United States Postal Service, Mail Center Security Website.](#)
- ✦ Public Health Foundation, Bioterrorism/Emergency Preparedness, **Video:** [Protecting Your Health for People Who Process, Sort and Deliver the Mail](#)

Evaluate the Credibility of the Threat

The first step to take for a potential anthrax threat is to evaluate the credibility of the threat. This is done by evaluating where your facility fits on the [Anthrax Risk Reduction Matrix](#). The actions you should take if you have an anthrax threat at your worksite will depend on your zone.

- ☞ Evaluate your facility using the [Anthrax Risk Reduction Matrix](#).

Determine What Actions You Should Take

After you have determined which zone your facility fits into on the [Anthrax Risk Reduction Matrix](#), the following table will help you determine what actions to take if you have an anthrax threat at your worksite.

Roll over the color boxes below (green, yellow, red) to see corresponding response actions. (This rollover effect will only work in Internet Explorer. For a version that works in Netscape Navigator, [click here](#).)

	Response Actions		
	Green Zone	Yellow Zone	Red Zone
Nature of the Anthrax Threat	A credible anthrax threat is unlikely at your facility.	A credible anthrax threat is possible at your facility.	Anthrax is strongly suspected or has been confirmed at your facility. The appropriate authorities should already be involved in the the anthrax mitigation efforts.
Physical evidence (such as a suspicious package containing powder)			
Epidemiological or medical observations (such as individual cases of anthrax)			
Threat (such as a phone call or letter stating that anthrax has been used)			

Click the color boxes below (green, yellow, red) to see corresponding response actions.

	Response Actions		
	<u>Green Zone</u>	<u>Yellow Zone</u>	<u>Red Zone</u>
Nature of the Anthrax Threat	A credible anthrax threat is unlikely at your facility.	A credible anthrax threat is possible at your facility.	Anthrax is strongly suspected or has been confirmed at your facility. The appropriate authorities should already be involved in the the anthrax mitigation efforts.
Physical evidence (such as a suspicious package containing powder)	<p>1. Determine if there is a logical explanation for the "physical evidence" (e.g. suspicious package or powder). Some examples may include:</p> <ul style="list-style-type: none"> Ⓞ If you receive a suspicious package, try to identify who sent it and call them to ask about it. Ⓞ If you find suspicious powder, try to determine if the powder came from a logical source (e.g. powdered soap dispenser, spilled baking soda box, construction debris, etc.). <p>2. If you determine that the "physical evidence" came from a logical source and it is not suspicious, it is unlikely that anthrax is present.</p>		
Epidemiological or medical observations (such as individual cases of anthrax)	<p>1. If one or more employees are exhibiting symptoms of anthrax:</p> <ul style="list-style-type: none"> Ⓞ Encourage them to see a health care professional to evaluate the cause of the symptoms. Ⓞ Many of the anthrax symptoms are similar to common illnesses, such as the flu, and can cause unnecessary distress in the workplace. <p>2. If no confirmed cases of anthrax are discovered, it is unlikely that a credible threat of anthrax exposure exists at your worksite.</p>		
Threat (such as a phone call or letter stating that anthrax has been used)	<p>1. Call 9-1-1 and report the threat. An anthrax threat is a criminal act, regardless if the threat is credible or not.</p>		

Click the color boxes below (green, yellow, red) to see corresponding response actions.
