

How to Develop an Ergonomics Process

taught by:

Dana Root

OSHA Region V Ergonomist

Presented by the SPI-OSHA Alliance

Tuesday, June 24, 2003

2:00 - 3:00 pm

Free of charge

Wednesday, June 25, 2003

11:00 am – noon

Free of charge

It's not too late to register!

Don't miss this eye-opening, interactive workshop, developed jointly by SPI and OSHA to address our mutual concern over strain and sprain injuries to the lower back, shoulder & upper back, and hands, wrists, and fingers in the plastics processing industry.

You'll learn how to:

- Set up a successful ergonomics process
- Identify and analyze problem tasks
- Develop solutions that are successful in reducing injuries

You will receive a copy of the NIOSH guide, *Elements of Ergonomics Programs*.
