SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires OSHA to obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The paperwork provisions of the Standard specify requirements for: marking the rated load of cranes; preparing certification records to verify the inspection of the crane hooks, hoist chains, and rope; and preparing reports of rated load tests for repaired hooks or modified cranes. Records and reports must be maintained and disclosed upon request.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply—for example, by using automated or other

technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting an adjustment decrease of 35 burden hours, from 321,380 to 321,345 burden hours. This adjustment decrease in burden hours is due to the Agency removing burden hours for the disclosure of information during an inspection. Table 1 below describes each of the requested burden hours.

Type of Review: Extension of a currently approved collection.

Title: Overhead and Gantry Cranes (29 CFR 1910.179).

OMB Control Number: 1218-0224.

Affected Public: Business or other for-profits.

Number of Respondents: 642,566.

Frequency: On occasion; monthly; semi-annually.

Average Time per Response: Various.

Estimated Total Burden Hours: 321,345.

Estimated Cost (Operation and Maintenance): \$0.
