By and Under the Authority of:

KURT A. PETERMEYER
Regional Administrator
Subject: Local Emphasis Program for Ship/Boat Building and Repair

I. Purpose:

This notice establishes a Local Emphasis program for inspections of safety and health hazards in the ship and boat building and repair industry (NAICS 336611 and 488390, and, if on navigable waters, NAICS 336612, 713930, and 811490).

II. Scope:

This notice applies to the Columbia, Nashville and Raleigh Area Offices.

III. Expiration:

This notice expires within one year of the effective date, unless extended.

IV. Action:

OSHA compliance personnel shall ensure that the procedures contained in this notice are followed in conducting the Local Emphasis Program for ship and boat building and repair.

V. Background:

Shipyards are identified as one of the five industries considered most hazardous in OSHA's Strategic Plan. It has been determined that the Federal area offices have jurisdiction over all ship building and repair establishments in the states of Kentucky, Tennessee, North Carolina, and South Carolina and those boat building and repair establishments that are located on navigable waters. However, since the data initiative used to select establishments for the site specific targeting initiative did not collect information for employers in the federal area office jurisdiction in Kentucky, Tennessee, North Carolina, and South Carolina, it is necessary to implement this Local Emphasis Program, consistent with the guidance contained in OSHA Instruction CPL 04-00-001, Procedures for Approval of Local Emphasis Programs, (LEPs), in order to conduct inspections in the shipyard industry in Kentucky, Tennessee, North Carolina, South Carolina and contribute to Agency goal 1.1 to "Reduce the number of worker injuries, illnesses, and fatalities by focusing nationwide attention and Agency resources on the most significant types of workplace injuries and illnesses, the most hazardous industries, and the most hazardous workplaces."

In FY-13, the area offices conducted 19 inspections under the LEP. During this period an average of six violations per inspection was recorded. However, we are pleased to note that during this same time frame, no fatal injuries were recorded.

VI. Procedures:

1. Inspection Goals. The area offices covered by this notice shall conduct inspections under this program during the fiscal year in accordance with the following numerical goals:

<table>
<thead>
<tr>
<th>Area Office</th>
<th>Safety Inspections</th>
<th>Health Inspections</th>
</tr>
</thead>
<tbody>
<tr>
<td>Columbia</td>
<td>2</td>
<td>2</td>
</tr>
<tr>
<td>Nashville</td>
<td>3</td>
<td>3</td>
</tr>
<tr>
<td>Raleigh</td>
<td>3</td>
<td>3</td>
</tr>
</tbody>
</table>
2. **Scheduling.**

   a. Since no establishment list is provided by the national office, the area offices will develop a list of establishments (worksites) covered by this program in a manner consistent with the guidance contained in OSHA Instruction CPL 02-00-025, paragraph B.1.a.(2)(c); "where no establishment list is provided by the national office, the area director shall compile a complete list considering all establishments within the coverage of the office and using the best available information (e.g., commerce directories, commercial telephone listings, local permits, local knowledge)." Adjustments to the list for additions and deletions will follow guidelines in CPL 02-00-025, paragraph B.1.b.(1)(b)6. However, all employers in the subject NAICS’s will be considered for inspection, including those with ten or fewer employees due to the hazardous nature of the employment and the historically high injury and illness rates for the industry.

   b. After the establishment list for the area office has been adjusted as necessary, establishments on the list shall be numbered consecutively beginning with the number one, skipping deletions. Using a random number method and following the guidelines in OSHA Instruction CPL 02-00-025 a local experimental program inspection register shall be developed in the area office. Establishments will be selected in the order prescribed by the random numbers until the total of establishments selected equals the number of projected inspections for the year. The resulting list shall constitute the program inspection register.

   c. Establishments may be selected from the inspection register for inspection in an order that makes efficient use of available resources. If any establishment on the inspection register is documented to be unavailable for inspection, the next originally unscheduled establishment according to the application of the random number table shall replace it on the inspection register.

VII. **Recording in OIS.**

   The Inspection Forms for all inspections conducted in establishments that are covered by this program shall be coded as local experimental program inspections and marked "XBOATPRG."

VIII. **Evaluation.**

   1. **Area Director's Responsibility.** The area directors affected by this local experimental program shall submit to the ARA for Enforcement Programs by October 30th of each year, an evaluation report that shall include the following elements:

      a. The goal (purpose) of the program.

      b. The area director's opinion of how effective the program was in meeting its goal.

      c. Data and information to support the conclusion(s) stated in (b) above, e.g., enforcement statistics; serious hazards eliminated; decline in occupational injuries, illnesses and fatalities; impact on covered non-inspected employers; impact on suppliers of production equipment; egregious cases (if any).

      d. Statement of whether the program should be continued, accompanied by a brief rationale.
e. Description of any legal issues that arose which would necessitate a review by the Solicitor before renewal of the program could be approved.

f. Any other comments or recommendations, including findings which might have an impact on how OSHA or the industry does business.

2. Regional Office Responsibility. Based on the area director's evaluation and any other pertinent information, Enforcement Programs will prepare an evaluation of this program for the regional administrator's submission to the national office as required by current instructions.
