

OSHA REGIONAL NOTICE

U.S. DEPARTMENT OF LABOR

Occupational Safety and Health Administration

DIRECTIVE NUMBER: CPL 2 02-00-023

EFFECTIVE DATE: October 1, 2014

SUBJECT: Regional Emphasis Program for High Noise in Manufacturing Industries

REGIONAL IDENTIFIER: Region VI

ABSTRACT

- Purpose:** This Notice establishes a Regional Emphasis Program (REP) for inspections of health hazards related to high noise levels and other industry recognized hazards in the following manufacturing industries: Sawmills and Planing Mills (SIC 242); Wood Containers (SIC 244); Miscellaneous Plastics Products (SIC 308); Concrete, Gypsum, and Plaster Products (SIC 327); and Cut Stone and Stone Products (SIC 328). See Appendix A for corresponding NAICS.
- Scope:** This Notice applies to all worksites in Arkansas, Louisiana, Oklahoma, and Texas, and those worksites in New Mexico that are under Federal OSHA jurisdiction.
- References:** OSHA Instruction CPL 04-00-001 (CPL 2-0.102A)
OSHA Instruction CPL 02-00-150 (CPL 2.148)
OSHA Instruction CPL 02-00-025 (CPL 2.251)
OSHA Instruction CPL 02-00-051 (CPL 2-051J)
- Cancellations:** Region VI Regional Notice CPL 2 02-00-023 dated October 1, 2013, Regional Emphasis Program for High Noise Industries.
- State Impact:** Region VI 21(d) Consultation Project Offices in Arkansas, Louisiana, Oklahoma, New Mexico and Texas will provide outreach, consultation services, and training to affected employers as requested.
- Action Offices:** Region VI Area and District Offices
Region VI Consultation Project Offices
Dallas Regional Office
- Information Office:** New Mexico Occupational Health and Safety Bureau

Originating Office: Dallas Regional Office

Contact: Assistant Regional Administrator for
Enforcement Programs

- I. **Purpose.** This Notice establishes a Regional Emphasis Program (REP) for inspections of health hazards related to high noise levels and other industry recognized hazards in the following manufacturing industries: Sawmills and Planing Mills (SIC 242); Wood Containers (SIC 244); Miscellaneous Plastics Products (SIC 308); Concrete, Gypsum, and Plaster Products (SIC 327); and Cut Stone and Stone Products (SIC 328). See Appendix A for corresponding NAICS.

Note: Region VI presently has a Regional Emphasis Program (REP) for the Fabricated Metal Products, Except Machinery and Transportation Equipment industries (SIC Code Major Group 34). The Fabricated Metal Product REP encompasses in part, Fabricated Structural Metal Products (SIC 344) and Miscellaneous Fabricated Metal Products (SIC 349). These two industries were listed in the top eight industries of OSHA's Industry Profile for OSHA Standard 1910.95 (Occupational Noise Exposure). Since the Fabricated Metal Product REP already includes SICs 344 and 349, to prevent duplicative enforcement activities these two industries have been excluded from this High Noise REP.

- II. **Scope.** This Notice applies to all Area Offices in Region VI and those worksites in New Mexico that are under Federal Jurisdiction.

III. **References.**

- A. OSHA Instruction CPL 04-00-001 (CPL2-0.102A), November 10, 1999, Procedures for Approval of Local Emphasis Programs ("LEPs") or current update.
- B. OSHA Instruction CPL 02-00-150 (CPL 2.150), April 22, 2011, Field Operations Manual (FOM) or current update.
- C. OSHA Instruction CPL 02-00-025 (CPL 2.251), January 4, 1995, Scheduling System for Programmed Inspections or current update.
- D. OSHA Instruction CPL 02-00-051 (CPL 02-00.051), May 28, 2005, Enforcement Exemptions and Limitations under the Appropriations Act or current update.
- E. OSHA Standards at Subpart G – Occupational Health and Environmental Control.
- F. NIOSH – Industrial Noise Control Manual.
- G. DHHS (NIOSH) Publication Number 2010-136, Occupationally-Induced Hearing Loss

- IV. **Expiration.** This Notice expires on September 30, 2015, but may be renewed as necessary.

- V. **Background.** A 2010 NIOSH publication indicated there are an estimated 16 million people working in the Manufacturing Sector, which accounts for approximately 13% of the U.S. workforce. According to the Bureau of Labor Statistics, occupational hearing

loss is the most commonly recorded occupational illness in manufacturing (17,700 cases out of 59,100 cases), accounting for 1 in 9 recordable illnesses. More than 72% of these occur among workers in Manufacturing. These numbers are particularly disturbing considering that a person's hearing loss must be determined to be work-related and the hearing loss must be severe enough that the worker has become hearing impaired, in order to be OSHA-recordable. Many more workers would have measurable occupational hearing loss but would not yet have become hearing impaired.

According to OSHA's citation data for fiscal year 2011, the following manufacturing industries were among the top eight most frequently cited industries for occupational noise exposures: Sawmills and Planing Mills (SIC 242); Wood Containers (SIC 244); Miscellaneous Plastics Products (SIC 308); Concrete, Gypsum, and Plaster Products (SIC 327); and Cut Stone and Stone Products (SIC 328). Of the other three industries in the top 8, two are in SIC 34 and are already covered in the Fabricated Metal Products REP, and one is in wholesale trade.

In addition to hearing loss, OSHA's citation data shows that there are other hazards in these industries related to respiratory protection, lockout-tagout, mechanical power-transmission, electrical, woodworking machinery, powered industrial trucks, and hazard communication. This data shows the need for increased enforcement activity to reduce employee exposure to these safety and health hazards.

VI. Enforcement.

A. Hazard: High noise levels that induce employee hearing loss.

B. Scheduling of Inspections:

1. REP Inspection List. The high noise establishment list will consist of all establishments that were developed for the 2013 lists from the Office of Statistical Analysis for SIC Groups 242, 244, 308, 327, and 328.
2. Inspection Cycle. If fewer than ten establishments are identified for inspection, the establishments will, as a group be treated as one inspection cycle, and all of the establishments will be inspected, subject to the deletion criteria below. If more than ten establishments are identified for inspection, the establishments will first be listed in alphabetical order, and then a random numbers table will be applied to create a randomized list of establishments. The randomized list will then be divided into groups of ten establishments. Each group of establishments will constitute an inspection cycle. After the Area Office completes inspections of the worksites identified within the first cycle under this REP, the Area Office may (if resources permit and the first cycle of inspections are considered effective) conduct inspections in subsequent cycles.
3. Inspection Order. Establishments within a cycle may be inspected in any order so that Area Office resources are efficiently used. Once a cycle is begun, all establishments in the cycle are to be inspected before a new

cycle is started, except that carryovers will be allowed as provided for in OSHA Instruction CPL 2.25I.

4. Deletions. The Area Office will delete establishments that have received a comprehensive health inspection after October 1, 2010, if no citation (or other written notice of a hazard) related to high noise was issued as a result of the inspection. If such a citation or written notice of a hazard was issued, the Area Office shall have the discretion to delete such establishment if it knows that the hazard or condition was satisfactorily abated. The Area Office shall state in writing the basis for any deletions from the inspections list.
 5. Size of employer. Establishments with ten or fewer employees will be included in this program because of the insidious nature of high noise hazards. Inspection procedures and protocols outlined in the FOM will be followed with respect to these high noise related inspections. Safety violations discovered under this program will be addressed in accordance with CPL 02-00-051 (CPL 2-0.51J) "Enforcement Exemptions and Limitations under the Appropriations Act."
- C. Scope of REP Inspections: Inspections under this emphasis program will focus on manufacturing areas where potential high noise hazards may exist for employees. Other apparent health and safety hazards observed by the CSHO will be evaluated; if necessary, a safety referral will be made. The CSHO will evaluate all on-site employers through inspection, observation, photographs, video footage, measurements, and interviews of management and employees.
 - D. Citations: Citations for violations will be issued in accordance with the FOM, Chapters V, VI, and VII.
 - E. Interface with Unprogrammed Activity: Reports of imminent danger, fatalities, catastrophes, complaints, and referrals shall be scheduled as unprogrammed inspections, and shall be inspected in accordance with the applicable provisions of the FOM.
 - F. Inspection Resources: All OSHA personnel participating in this REP must be familiar with the policies and procedures described in this notice.
 - G. CSHO Personal Protective Equipment (PPE): CSHOs will use personal protective equipment suitable for the targeted industry. PPE will include, at a minimum, respiratory protection, a hard hat, safety glasses with side shields, safety shoes/boots (with metatarsal guards as necessary), and hearing protection.
 - H. Relationship to Other Programs. Reports of imminent danger, fatality/catastrophe, complaints and referrals shall be scheduled as unprogrammed inspections and shall be inspected in accordance with the applicable provisions of the FOM, OSHA Instruction CPL 02-00-150 (CPL 2.148). This does not, however, limit the Area Office's authority to conduct an inspection in accordance with this REP of any establishment selected for inspection pursuant to this REP.

If an unprogrammed inspection is to be conducted at a facility that is also included in the current inspection cycle under this REP, the Area Office may conduct the inspections concurrently.

VII. Recording in OIS and IMIS.

- A. Enforcement Inspections: Enforcement inspections completed under this initiative will be coded:

In OIS in the Inspection Type sub tab:

1. Initiating Type will be coded "Programmed Planned" with the following exception. Any inspections conducted as a result of a complaint, referral, or fatality/catastrophe will be coded as the appropriate "unprogrammed" activity.
2. Local Emphasis Program will be coded **NOISE** for all programmed and unprogrammed inspections.
3. Strategic Plan Activity will be coded with any strategic plan codes applicable to the current inspection.
4. Additional Codes will be coded with any applicable additional codes.

- B. Enforcement Interventions: Enforcement Interventions completed under this initiative, including partnerships, alliances, Voluntary Protection Programs, and other interventions, will be coded:

In OIS in the Task sub tab, Task Details, Emphasis Areas as follows:

1. Local Emphasis Programs will be coded **NOISE**.
2. Strategic Emphasis Areas will be coded with any strategic plan codes applicable to the current inspection.
3. Other Emphasis Areas will include any applicable additional codes and the codes specific to the construction activity covered by the inspection per VII.A.4.

- C. Consultation Visits: Consultation Visits completed under this initiative will be coded:

1. In IMIS on the Request Form CONS-20:
 - a. Local Emphasis will be coded **NOISE**.
 - b. Field 18 will include any applicable additional codes and the codes specific to the construction activity covered by the inspection per VII.A.4.

2. In IMIS on the Visit Form CONS-30:
 - a. Local Emphasis will be coded **NOISE**.
 - b. Field 22 will include any applicable additional codes and the codes specific to the construction activity covered by the inspection per VII.A.4.

D. Consultation Interventions: Consultation Interventions completed under this initiative will be coded:

In IMIS on the Consultation Intervention Form CONS-66:

1. Local Emphasis will be coded **NOISE**.
2. Field 15 will include any applicable additional codes and the codes specific to the construction activity covered by the inspection per VII.A.4.

E. Area Offices, Consultation Projects, and the Regional Office shall periodically check their OIS and/or IMIS databases to verify accuracy of the data for the initiative.

VIII. Outreach.

All REPS must contain an outreach component that must be executed prior to the initiation of the enforcement program. The method of outreach is at the Area Director's discretion and can consist of one or more of the following components.

1. Broadcast mail-outs or program information.
2. Stakeholder meetings.
3. Targeted training sessions.
4. Presentations to the affected group(s).

The outreach component selected should be conducted prior to the start of the inspection portion of the REP. The timing of this should be sufficient to insure that employers have been provided fair notice of the program and opportunities to achieve voluntary compliance. These outreach efforts should be coordinated with or include the OSHCON program for that area.

IX. Partnerships and Alliances.

In the event outreach efforts result in interest for developing an alliance or partnership, the Area Director will insure that these efforts conform to current National and Regional Policy.

X. Evaluation.

An evaluation of this program will be submitted by the Area Directors to the Regional Office no later than October 15, 2015. Elements to be considered in the evaluation are contained in OSHA Instruction CPL 04-00-001.
