

**Worksheet**

**Communicable Disease Module**

Your committee has been charged with educating the staff on the potential outbreak of \_\_\_\_\_ (write your bug/disease). There will be three parts in your investigation.

**Part I:**

Everyone at school is nervous. Your responsibility is finding out as much information as possible to educate your colleagues/co-workers.

**Find out:**

What causes your disease? \_\_\_\_\_

---

---

How is it transmitted? \_\_\_\_\_

---

---

What are the symptoms/illnesses associated with the illness? \_\_\_\_\_

---

---

Are there special issues for adults? \_\_\_\_\_

---

---

**Please begin your poster for your colleagues. Draw the bug or symptoms and put down what you have found.**

**Part 2: Transmission**

Find out how your disease is transmitted or spread. \_\_\_\_\_

---

---

**Add this information to your poster. Feel free to add a diagram.**

### **Part 3: Prevention**

What advice would you give your colleagues on reducing or preventing their exposure to the disease?

---

---

Are there some staff members who may be at higher risk and need encouragement to take action?

---

---

**Add this information to your poster.**
