

OSHA Bloodborne Pathogens Quiz 3: Prevention

Multiple Choice

Identify the choice that best completes the statement or answers the question.

- _____ 1. CDC Standard Precautions assume:
- a. workers at risk of exposure or OPIM are aware of their risks
 - b. all blood or OPIM is infectious
 - c. devices are the primary cause of exposure to blood or OPIM
 - d. a deceased person's blood is not infectious
- _____ 2. Which of the following is NOT a broad category of adaptations required by CDC Standard Precautions?
- a. Personal protective equipment
 - b. Safe work practices
 - c. Engineering controls
 - d. Exposure determination
- _____ 3. For which category would you assume 100 microbes exist on one inch of a surface?
- a. Highly contaminated surface
 - b. Contaminated surface
 - c. Disinfected surface
 - d. Sterile surface
- _____ 4. The recommended time for rubbing hands during handwashing is:
- a. 5-10 seconds
 - b. 15-20 seconds
 - c. 30 seconds
 - d. One minute
- _____ 5. What is the understanding behind using a dry paper towel to turn off the faucet after handwashing?
- a. It prevents microbes that may still be on your hands from contaminating the faucets
 - b. It allows you to disinfect the environment at the same time as handwashing
 - c. Microbes can move through wet materials
 - d. Actually, you simply use the same paper towel you used to dry your hands to turn off the faucet
- _____ 6. For which circumstance would it be acceptable to replace handwashing with application of hand gel or foam?
- a. When hands are visibly contaminated
 - b. When the hand gel contains at least 40% alcohol
 - c. After touching a person's arm to reassure them
 - d. You have used hand gel the last three times you performed hand hygiene
- _____ 7. If you are in an area that does not have tissues to cover your cough, it is acceptable to:
- a. cough into your shoulder
 - b. cough into your elbow
 - c. cough into your hands
 - d. not cover your cough
- _____ 8. Which of the following are microbes incapable of?
- a. Moving across surfaces
 - b. Being blown from surface to surface
 - c. Aerosolizing
 - d. Moving through a dry surface
- _____ 9. What is NOT considered an ideal environment for microbes to thrive, grow, and reproduce?
- a. Dry environment
 - b. Dark environment
 - c. Warm environment
 - d. Area with little air movement

Name: _____

ID: A

- ___ 10. If you do not have a medical-grade disinfectant, a fresh mix of water and bleach may be substituted with the following ratio:
- a. 5:1
 - b. 10:1
 - c. 20:1
 - d. 50:1
- ___ 11. When would you NOT expect to receive the hepatitis B vaccine?
- a. Within ten days of hire
 - b. One month after hire
 - c. Three months after hire
 - d. Six months after hire
- ___ 12. Which of the following is TRUE regarding the hepatitis B vaccine and employment settings where the risk of exposure to blood or OPIM is high?
- a. A booster is recommended every ten years
 - b. You may refuse the vaccine, but will assume all liability if you contract it on-the-job
 - c. The employer can charge employees for the vaccine if the cost would be an extreme hardship to them
 - d. The hepatitis vaccine is only partially effective in protecting against hepatitis B infections
- ___ 13. Long-term onsite storage of biohazard is allowed up to 30 days at a facility if:
- a. the area is locked, labeled as biohazard storage and kept clean
 - b. containers in public areas are kept closed
 - c. it is inconvenient to transport the waste more often
 - d. it is double bagged
- ___ 14. Which of the following is NOT a recommended rule for glove removal if gloves are contaminated with blood or OPIM?
- a. Grab the outside of glove one and pull it off
 - b. Place glove one in the palm of glove two
 - c. Place your fingers under the cuff of glove two to pull it off
 - d. Discard both gloves in a biohazard container
- ___ 15. True or False? The public assumes all gloves are contaminated.
- a. True
 - b. False
- ___ 16. True or False? If your employer is struggling with finances, it is acceptable to soak gloves contaminated with blood in a bleach/water solution.
- a. True
 - b. False
- ___ 17. Which is CORRECT about latex allergies?
- a. Your employer can charge you extra for gloves that are latex-free
 - b. Signs can vary and range from skin irritation to loss of breathing
 - c. Allergies diminish over time through increased exposure to latex
 - d. Allergies are very rare
