

## Basal Cell

- A small raised bump that looks smooth, shiny, and translucent.
- A small, pink, crater-like growth with a raised, rolled border and an indentation in the center.
- A scar-like area that is white, yellow, or waxy.
- Reddish, irritated patches of skin.
- A sore that does not heal.
- Can usually be removed by excision or topical treatments.
- If diagnosed and treated early, basal cell cancers can be cured.
