

## Safety Harness Dance Script

### Scene One:

*Older worker:* Aren't you going to use your safety harness?

*Younger workers:* No

*Older worker:* Why?

*Younger workers:* It's complicated

*Older worker:* It's very simple. It can save your life.  
Come with me and I'll show how to use it

### Scene Two:

The ladies danced to debunk myths that wearing a safety harness is restrictive and uncomfortable and to show that it is easy to move while using a safety harness, and to culturally make it cool for guys/workers on the roof to use it as well.

**Scene Three:**

*Natalicia:* Hey guys, as you saw on the demonstration, it's not difficult to move around while using a safety harness. But remember, when you use it, it's important that this rope is anchored to the back of your harness, and that it is fastened well to this roof anchor that will be on the building. My name is Natalicia Tracy, I am the Executive Director of the Brazilian Worker Center, and we worry about the health and safety of our community.

*Older worker:* Yes ma'm, but does it really work?

*Natalicia:* Sure - guaranteed!
