

# Susan Harwood Training Grant Program

## FY 2017 Target Topic Training Grant Recipients

Organization Name	City	State	Award Amount	Topic
<b>Citizen Action of Wisconsin Education Fund</b>	Milwaukee	WI	\$155,000	Chemical Hazards/ Hazard Communications
The grantee proposes to provide 1.75 to 3 hours of chemical hazards training to 454 small business young workers, minority workers, temporary workers, as well as new and small business owners. Target audience includes small business young workers, minority workers, temporary workers, as well as new and small business owners. Training topics will include chemical hazards and the Global Harmonized System (GHS). Grantee plans to use existing training materials and develop materials. Training will be offered in Spanish and Hmong.				
<b>Comite de Apoyo a los Trabajadores Agricolas</b>	Glassboro	NJ	\$50,631	Chemical Hazards/ Hazard Communications
The grantee proposes to provide 2.5 hours of chemical and hazard communication training to 160 limited English proficiency migrant and farm workers. Target audience includes the Latino migrant farm and high-hazard industry worker community. Training topics will include chemical and hazard communication. Grantee plans to use existing training materials and convert them into Spanish. Training will be offered in English and Spanish.				
<b>Community Partners</b>	Los Angeles	CA	\$155,000	Chemical Hazards/ Hazard Communications
The grantee proposes to provide 2 to 4.5-hours of chemical hazard awareness training to 600 employees and workers in the nail salon, daycare, and housecleaning industries. Target audience includes employers, employees, and minority and hard-to-reach workers. Training topics will include chemical hazards and hazard communication, identifying hazards in the workplace, controlling hazards in the workplace, and health and safety rights and responsibilities. Grantee plans to use existing training materials. Training will be offered in English, Spanish, and Vietnamese.				
<b>District 1199C Training &amp; Upgrading Fund</b>	Philadelphia	PA	\$155,000	Chemical Hazards/ Hazard Communications
The grantee proposes to provide 1 hour of chemical hazard training to 1,240 workers and employers in the healthcare industry. Target audience includes low-literacy, educationally challenged, hard-to-reach, and young workers. Grantee plans to develop new training materials. Training will be offered in English.				
<b>Interfaith Worker Justice</b>	Chicago	IL	\$155,000	Chemical Hazards/ Hazard Communications
The grantee proposes to provide 2 hours of chemical hazards training to 900 train-the-trainer and workers. Target audience includes non-literate, low-literacy and limited English proficiency workers; workers and employers in high-hazard industries; temporary workers, minorities, other hard-to-reach workers, and young workers. Training topics will include chemical hazards, global harmonized system, and job hazard analysis. Grantee plans to use existing training materials. Training will be offered in English, Spanish, Somali, Tagalog, and Marshallese.				
<b>Massachusetts Coalition for Occupational Safety and Health</b>	Dorchester	MA	\$155,000	Chemical Hazards/ Hazard Communications
The grantee proposes to provide 2 hours of chemical hazard communication training to 1,085 trainees in high-hazard industries. Target audience includes young workers, minority and limited English proficiency workers. Training topics will include chemical hazards, labeling and Safety Data Sheets. Grantee plans to use existing training materials and/or develop new materials. Training will be offered in English and Spanish.				
<b>Migrant Clinicians Network, Inc.</b>	Austin	TX	\$155,000	Chemical Hazards/ Hazard Communications
The grantee proposes to provide 1.5 hours of chemical hazards/hazard communication training to 850 clinical health workers. Target audience includes non-literate, low-literacy, or limited English proficiency workers, workers and employers in high-hazard industries. Training topics will include the recognition of chemical hazards and working safely around chemicals. Grantee plans to use previously developed materials. Training will be offered in English and Spanish.				
<b>National Council on Occupational Safety and Health</b>	Somerville	MA	\$150,082	Chemical Hazards/ Hazard Communications
The grantee proposes to provide 2 hours of chemical hazard training to 605 to workers and employers in general industry including food service/restaurant, waste and recycling, janitorial, nail salon, auto repair, manufacturing, and retail. Target audience includes non-literate, low-literacy and limited English proficiency workers; workers and employers in high-hazard industries; temporary workers, minorities, other hard-to-reach workers, and young workers. Training topics will include the chemical hazards/hazard communication. Grantee plans to use existing training materials. Training will be offered in English and Spanish.				
<b>New Mexico Direct Caregivers Coalition</b>	Placitas	NM	\$112,676	Chemical Hazards/ Hazard Communications
The grantee proposes to provide 4 hours of chemical hazard training to 400 healthcare workers. Target audience includes workers and employers in high-hazard industries, temporary workers, minority, or other hard-to-reach workers. Training topics will include the chemical hazards/hazard communication for healthcare workers and employers. Grantee plans to revise and adapt other organizations' training programs. Training will be offered in English and Spanish.				

## 2017 Target Topic Training Grant Recipients (cont.)

<b>New York Committee for Occupational Safety and Health, Inc.</b>	New York	NY	\$155,000	Chemical Hazards/ Hazard Communications
The grantee proposes to provide 2-3 hours of chemical hazard training to 579 manufacturing, service, healthcare, and janitorial service workers. Target audience includes small and medium-sized businesses and employees in high risk workplaces. Training topics will include the chemical hazards. Grantee plans to develop training materials. Training will be delivered in English and Spanish.				
<b>Northwest Forest Worker Center</b>	Albany	CA	\$75,000	Chemical Hazards/ Hazard Communications
The grantee proposes to provide 2 hours of chemical hazards and hazard communication to 300 workers in the forest services industry. Target audience includes Latino forest workers and non-timber forest products in southern Oregon who are exposed to pesticides. Training topics will include how to recognize and abate chemical hazards, in particular pesticides and gasoline. Grantee plans to revise existing materials. Training will be offered in Spanish.				
<b>Nova Southeastern University</b>	Fort Lauderdale	FL	\$145,404	Chemical Hazards/ Hazard Communications
The grantee proposes to provide 7.5 hours of chemical hazards in maritime training for 320 Spanish-speaking maritime industry workers to ensure timely and appropriate response to hazardous events. Target audience includes workers and employers in high-hazard industries and non-literate, low-literacy, or limited English proficiency workers. Training topics will include understanding hazardous materials and risks, and Global Harmonization System. Training will be offered in Spanish.				
<b>Philadelphia Joint Board, Workers United</b>	Philadelphia	PA	\$76,897	Chemical Hazards/ Hazard Communications
The grantee proposes to provide 2 to 6 hours of chemical hazards and hazard communication training to 310 workers and trainers in the industrial laundry and manufacturing sectors. Target audience includes laundry workers of low-literacy and other hard-to-reach workers. Training topics will include chemical hazards, means of control, and the use of Personal Protective Equipment. Grantee plans to develop and translate into Spanish materials from existing sources. Training will be offered in English and Spanish.				
<b>SEIU Education and Support Fund</b>	Washington	DC	\$154,030	Chemical Hazards/ Hazard Communications
The grantee proposes to provide 2 hours of hazard communication training to 4,000 healthcare workers. Target audience includes hard-to-reach workers in high-hazard healthcare industry, English speaking or limited English proficiency. Training topics will include chemical hazard and hazard communication in general industry. Grantee plans to use existing training materials. Training will be offered in English, Russian, Chinese, and Spanish.				
<b>University of California, The Regents of the</b>	Berkeley	CA	\$155,000	Chemical Hazards/ Hazard Communications
The grantee proposes to provide 2 hours of chemical hazards/hazard communications training to non-literate, low-literacy, or limited English proficiency workers, temporary workers, minority, or other hard-to-reach workers, workers and employers in new small business, and young workers. Training topics will include chemical hazards, hazard communication standard, and safety data sheets. Grantee plans to use both existing and develop new training materials. Training will be offered in English and Spanish.				
<b>University of Puerto Rico – Medical Science Campus</b>	San Juan	PR	\$147,860	Chemical Hazards/Hazard Communications
The grantee proposes to provide 2.5 hours of targeted topic training on chemical hazards to 600 non-literate, low-literacy, or limited English proficiency workers, workers and employers in high-hazard industries, workers and employers in new small business. Grantee plans to use existing training materials. Training will be offered in Spanish.				
<b>Virginia Polytechnic Institute and State University</b>	Blacksburg	VA	\$142,042	Chemical Hazards / Hazard Communications
The grantee proposes to provide 2 hours of hazard communications training to 860 hospitality workers. Target audience includes janitorial and housekeeping staff and supervisors. Training topics will include the hazard communications, hazardous chemicals, exposure control methods, personal protective equipment, worker rights, health effects, employer responsibilities and whistleblower. Grantee plans to develop materials. Training will be offered in English and Spanish.				
<b>Work Environment Council of New Jersey</b>	Ewing	NJ	\$135,150	Chemical Hazards / Hazard Communications
The grantee proposes to provide 1-4 hours of chemical hazard awareness training to 320 employers and employees in the chemical and healthcare industries. Target audience includes supervisors, employees, and hard-to-reach workers. Training topics will include OSHA's Hazard Communication Standard. Grantee plans to use existing training materials. Training will be offered in English.				
<b>American Road and Transportation Builders Association - Transportation Development Foundation</b>	Washington	DC	\$155,000	Construction Road Zones
The grantee proposes to provide 2 to 4 hours of construction work zone training to 800 trainees in the road construction industry. Target audience includes small businesses, minorities, and hard-to-reach workers. Training topics will include the preventing backovers, runovers, and development of internal traffic control plans. Grantee plans to use existing training materials. Training will be offered in English and Spanish.				

## 2017 Target Topic Training Grant Recipients (cont.)

<b>CASA de Maryland</b>	Hyattsville	MD	\$131,720	Construction Road Zones
The grantee proposes to provide 1 to 3 hours of construction road zones training to 841 temporary workers, minority, or other hard-to-reach workers, workers and employers in high-hazard industries. Target audience includes non-literate, low-literacy, or limited English proficiency workers, temporary workers, minority, or other hard-to-reach workers, workers and employers in high-hazard industries, and young workers. Training topics will include hazards in construction road zones. Grantee plans to use existing training materials. Training will be offered in English, French and Spanish.				
<b>Evergreen Safety Council</b>	Kirkland	WA	\$155,000	Construction Road Zones
The grantee proposes to provide 2 hours of construction road zone training to 788 workers. Target audience includes low-literate hard-to-reach workers. Training topics will include the construction road zone hazards. Grantee plans to develop training materials. Training will be offered in English.				
<b>LIUNA Training and Education Fund</b>	Pomfret Center	CT	\$123,926	Construction Road Zones
The grantee proposes to provide 4 to 8 hours of construction road zones training to 2,070 workers in high-hazard, hard-to-reach situations with high job-related fatalities. Target audience includes construction craft laborers. Training topics will include safety and health topics associated with construction work zones. Grantee plans to use existing materials. Training will be offered in English.				
<b>Chicagoland Construction Safety Council</b>	Hillside	IL	\$100,405	Electrical Hazards
The grantee proposes to provide 4 hours of electrical hazards training to 400 construction workers. Target audience includes workers in industries with high fatality rates. Training topics will include the recognition and abatement of electrical hazards. Grantee plans to use existing materials. Training will be offered in English and Spanish.				
<b>Iowa Lakes Community College</b>	Estherville	IA	\$152,701	Electrical Hazards
The grantee proposes to provide 6 hours of electrical hazards training to 325 construction and general industry workers. Target audience includes non-literate, low-literacy, or limited English proficiency workers, workers and employers in high-hazard industries. Training topics will include the recognition and abatement of electrical hazards. Grantee plans to revise previously developed materials. Training will be offered in English and Spanish.				
<b>Legal Aid Justice Center</b>	Charlottesville	VA	\$64,289	Electrical Hazards
The grantee proposes to provide 1.25 hours of electrical hazards training to 700 day laborers of limited English proficiency, non-literate and low-literacy workers, temporary workers, minority and other hard-to-reach workers. Target audience includes day laborers. Training topics will include electrical hazards. Grantee plans to develop new materials from existing materials. Training will be offered in Spanish.				
<b>South Central Workforce Investment Board</b>	Harrisburg	PA	\$107,286	Electrical Hazards
The grantee proposes to provide 4 hours of electrical hazard training to 250 workers in high-hazard manufacturing industries. Target audience includes workers in high-hazard industries. Training topics will include electrical safety. Grantee plans to develop new materials specific to the industry trends of the targeted audience. Training will be offered in English.				
<b>State Building and Construction Trades Council of California</b>	Sacramento	CA	\$155,000	Electrical Hazards
The grantee proposes to provide 0.5-1.5 hours of electrical hazards in construction training to 1,005 workers in the construction industry. Target audience includes high-risk, high-hazard workers. Training will focus on unsafe equipment or installation, unsafe environment, and unsafe work practices. Grantee plans to develop materials. Training will be offered in English and Spanish.				
<b>Tree Care Industry Association, Inc.</b>	Londonderry	NH	\$154,233	Electrical Hazards
The grantee proposes to provide 5.5 to 6.5 hours of electrical hazards in aerial lift operations training to 650 tree care workers. Target audience includes non-literate, low-literacy, or limited English proficiency workers, workers and employers in high-hazard industries, workers and employers in industries with high fatality rates. Training topics will include basic electric, identification of electrical conductors, avoidance techniques, and emergency response and aerial lift safe operation. Grantee plans to use previously developed materials. Training will be offered in English and Spanish.				
<b>University of Texas</b>	El Paso	TX	\$154,595	Excavation Hazards
The grantee proposes to provide 1.5 hours of excavation hazard training to 1,050 non-English speaking vulnerable workers within the construction industry. Target audience includes non-English speaking construction workers. Training topics will include the OSHA standards, trench hazard identification, soil classification and testing, PPE, competent person responsibilities, and emergency trench rescue. Grantee plans to use existing training materials and will convert them into Spanish. Training will be offered in English and Spanish.				
<b>UWUA Power for America Training Trust Fund</b>	Charlotte	MI	\$66,334	Excavation Hazards
The grantee proposes to provide 2 hours of excavation hazard training to 500 construction workers. Target audience includes workers and employers in high-hazard industries. Training topics will include excavation safety issues, appropriate procedures and solutions when confronting hazards, and effective communication with fellow workers. Training will be offered in English.				

## 2017 Target Topic Training Grant Recipients (cont.)

<b>Washington On-Site Sewage Association</b>	Puyallup	WA	\$148,365	Excavation Hazards
The grantee proposes to provide 6 hours of trenching and excavation training to 350 workers in the wastewater and sewage industry. Target audience includes small business, new business, limited English proficiency workers, non-literate and low-literacy, minority and other hard-to-reach workers. Grantee plans to alter existing training materials and further develop them to be industry specific. Training will be offered in English.				
<b>Wayne State University</b>	Detroit	MI	\$137,098	Excavation Hazards
Grantee proposes to provide 3 hours of excavation hazard training to 400 workers. Topics will include cave-ins and their causes, soil classification, cave-in protective systems, and other excavation hazards. Target population will consist of operating engineers, construction and pipe laborers, and other construction trades to include limited English speaking workers. New training materials will be developed with an online component. Training will be conducted in English and Spanish.				
<b>Western Iowa Tech Community College</b>	Sioux City	IA	\$149,949	Excavation Hazards
Grantee proposes to provide 6 hours of excavation hazards training to 400 non-literate/low-literacy workers, temporary or minority workers, young workers, new small business workers, and all other at-risk workers. Training topics will include excavation safety training including soil classification and protective systems. Grantee plans to use existing training materials. Training will be offered in English and Spanish.				
<b>Associated General Contractors of America, The</b>	Arlington	VA	\$154,494	Fall Prevention in Construction
The grantee proposes to provide 7.5 hours of fall prevention in construction training to 640 construction workers. Target audience includes non-literate, low-literacy, or limited English proficiency workers. Grantee plans to develop materials. Training will be offered in English and Spanish.				
<b>Brazilian Worker Center, Inc.</b>	Allston	MA	\$124,200	Fall Prevention in Construction
The grantee proposes to provide 4 hours of fall prevention training to 606 residential construction workers. Topics include roofing hazards, ladders, scaffolds, and harnesses. Target audience includes Portuguese and Spanish speaking immigrant workers in construction. Grantee plans to use revised and updated existing training materials. Training will be offered in Portuguese and Spanish.				
<b>Casa Latina</b>	Seattle	WA	\$150,777	Fall Prevention in Construction
The grantee proposes to provide 1-3 hours of fall prevention training to 550 construction workers. Target audience includes non-literate, low-literacy, and limited English proficiency workers; temporary workers, minority, and other hard-to-reach workers; and workers in high-hazard industries and industries with high fatality rates. Training topics will include fall prevention in construction. Grantee plans to develop materials. Training will be offered in Spanish.				
<b>Compacion Foundations, Inc.</b>	Balch Springs	TX	\$149,043	Fall Prevention in Construction
The grantee proposes to provide 4 hours of fall prevention training to 300 construction industry/workers. Target audience includes non-literate, low-literacy, or limited English proficiency workers, temporary workers, minority, or other hard-to-reach workers, workers and employers in high-hazard industries, workers and employers in industries with high fatality rates. Training topics will include stairways, ladders, scaffolds, roofing, falls, hazards, fall protection equipment, and personal fall arrest systems. Grantee plans to update existing training materials. Training will be offered in English and Spanish.				
<b>El Paso Community College District</b>	El Paso	TX	\$85,506	Fall Prevention in Construction
The grantee proposes to provide 4 hours of fall prevention in construction training to 1,260 construction workers. Target audience includes temporary workers, minority, or other hard-to-reach workers; non-literate, low-literacy, or limited English proficiency workers and young workers. Training topics will include fall prevention in construction. Grantee plans to use existing training materials. Training will be offered in English and Spanish.				
<b>Florida International University Board of Trustees, The</b>	Miami	FL	\$155,000	Fall Prevention in Construction
The grantee proposes to provide 3 hours of fall prevention in construction training to 600 non-literate, low-literacy, or limited English proficiency workers, and workers/employers in high-hazard industries. Grantee plans to use or revise existing training materials and will develop materials based on results of a proposed training needs assessment. Training will be offered in English and Spanish.				
<b>Job-Site Safety Institute</b>	Raleigh	NC	\$150,700	Fall Prevention in Construction
The grantee proposes to provide 4 hours of fall prevention in construction training to 750 residential construction workers. Target audience includes non-literate, low-literacy, or limited English proficiency workers, workers and employers in high-hazard industries, workers and employers in industries with high fatality rates, workers and employers in new small business. Training topics will include falls from ladders, scaffolds, roofs, trusses, and steel erection. Grantee plans to use existing and develop new training materials. Training will be offered in English and Spanish.				

## 2017 Target Topic Training Grant Recipients (cont.)

<b>Latino Worker Safety Center</b>	Hillside	IL	\$154,534	Fall Prevention in Construction
The grantee proposes to provide 4 hours of fall prevention in construction training to 700 construction industry workers. Target audience includes limited English proficiency, temporary, minority, hard-to-reach and high-hazard industry workers. Training topics will include fall prevention standards. Grantee plans to use existing training materials developed under previous Susan Harwood grants. Training will be offered in Spanish.				
<b>National Association of Tower Erectors</b>	Watertown	SD	\$155,000	Fall Prevention in Construction
The grantee proposes to provide 6 hours of fall prevention training during rigging operations to 312 communication tower workers. Target audience includes workers with small businesses, workers and employers in industries with high fatality rates, and workers in high-hazard industries. Training topics will include rigging safety. Grantee plans to develop materials.				
<b>North Carolina State University</b>	Raleigh	NC	\$150,000	Fall Prevention in Construction
The grantee proposes to provide 3 hours of fall prevention in construction training to 420 trainees. Target audience includes young workers. Training topics will include the causes of falls and principle of fall protection, conventional methods of fall protection, non-conventional solutions for fall systems, training requirements, requirements relating to fall protection, fall protection plans, and residential and non-residential construction. Grantee will revise existing materials and develop new materials. Training will be offered in English and Spanish.				
<b>Organization of Hispanic Contractors</b>	Dallas	TX	\$155,000	Fall Prevention in Construction
The grantee proposes to provide 2 hours of fall protection training to 740 workers and employers in the construction industry. Target audience includes minorities and hard-to-reach workers. Training topics will include the falls from heights, ladders, scaffolds, failure to use proper personal protective equipment, head protection, harness protection, floor holes, guardrails, open stairways, slips, trips, slopping, and use of safety nets and other fall arrest systems. Grantee plans to use existing training materials. Training will be offered in English and Spanish.				
<b>Philadelphia Area Project on Occupational Safety and Health</b>	Philadelphia	PA	\$139,386	Fall Prevention in Construction
The grantee proposes to provide 3 hours of fall prevention training to 475 workers. Target audience includes non-literate, low-literacy, or limited English proficiency workers, temporary workers, minority, or other hard-to-reach workers, workers and employers in high-hazard industries, workers and employers in industries with high fatality rates, and young workers. Training topics will include scaffolds, ladders, roofs, and fall arrest systems. Grantee plans to use existing training materials. Training will be offered in English, Spanish, and Portuguese.				
<b>Red Rocks Community College</b>	Lakewood	CO	\$155,000	Fall Prevention in Construction
The grantee proposes to provide 7.5 hours of targeted topic training to 750 to construction workers. Target audience includes hard-to-reach, low-literacy and limited English, and young workers. Training topics will include fall prevention in construction. Grantee plans to use existing training materials. Training will be offered in English and Spanish.				
<b>Rutgers, The State University of New Jersey - PBHS School of Public Health</b>	Somerset	NJ	\$155,000	Fall Prevention in Construction
The grantee proposes to provide 4 to 7.5 hours of fall prevention in construction training to 575 non-literate, low-literacy, or limited English proficiency workers, temporary workers, minority, or other hard-to-reach workers, workers and employers in high-hazard industries, workers and employers in industries with high fatality rates, and workers and employers in new small businesses. Training topics will include fall hazards, controlled access zones, and scaffolding. Grantee plans to use existing and develop new training materials. Training will be offered in English and Spanish.				
<b>Solar Energy International</b>	Paonia	CO	\$154,766	Fall Prevention in Construction
The grantee proposes to provide 12 hours of solar energy industry hazard training to 1,000 solar industry workers. Target audience includes workers and employers in industries with high fatality rates. Training topics will include; lock-out/tag-out, ladder safety, and installation and racking methods. Training will be offered in English in a web training format.				
<b>South Arkansas Community College</b>	El Dorado	AR	\$133,783	Fall Prevention in Construction
The grantee proposes to provide 2 hours of fall protection in construction training to 538 contractor employees. Target audience includes contractor employees in high hazard industries with limited English proficiency, and/or work for small businesses. Training topics will include the prevention of falls. Grantee plans to use existing training materials with some updating and revision. Training will be offered in English and Spanish.				
<b>Structural Building Components Association</b>	Madison	WI	\$122,260	Fall Prevention in Construction
The grantee proposes to provide 4 hours of fall protection in construction training to 315 framing labor workers. Target audience includes only workers in Wisconsin. Training topics will include ladders, protection from falling objects, guardrails, scaffolding, personal fall arrest systems, positioning device systems, and horizontal lifelines. Grantee plans to use existing training materials. Training will be offered in English and a Spanish interpreter will be available.				

## 2017 Target Topic Training Grant Recipients (cont.)

<b>University of Houston - Clear Lake</b>	Houston	TX	\$114,703	Fall Prevention in Construction
The grantee proposes to provide 3 to 7.5 hours of fall prevention training to 420 Latino high-hazard industry workers. Target audience includes individuals working within the construction industry. Training topics will include stairways and ladders, scaffolding, fall protection systems, steel erection and underground construction. Grantee plans to use existing and develop new materials. Training will be offered in English and Spanish.				
<b>AgriSafe Network, Inc.</b>	Greenville	IA	\$155,000	Grain Handling Operations
The grantee proposes to provide 1 to 3 hours of grain handling operations training to 660 grain handling workers through webinars and workshops. Target audience includes agricultural producers, workers in high-hazard grain operations and English and non-English speaking grain handling workers. Training topics will include confined space grain bin entry, respiratory protection program and prevention strategies. Grantee plans to use existing training materials. Training will be offered in English and Spanish.				
<b>Iowa State University of Science and Technology</b>	Ames	IA	\$145,840	Grain Handling Operations
The grantee proposes to provide 4 hours of grain handling operations training to 315 workers and employers in industries with high fatality rates. Target audience includes grain handling operation workers and employers, and workers from the agribusiness insurance industry and those who construct grain handling equipment and elevator and feed mill facilities. Training topics will include grain dust properties, dust mitigation, controlling ignition sources, equipment and facility maintenance, engineering controls and other topics. Grantee plans to revise existing training materials and develop additional materials. Training will be offered in English.				
<b>Oklahoma State University</b>	Stillwater	OK	\$155,000	Grain Handling Operations
The grantee proposes to provide 4-7 hours of grain handling operations training to 315 workers. Target audience includes workers in industries with high fatality rates, workers and employers in high-hazard industries, temporary workers, minority, or other hard-to-reach workers, young workers, and workers and employers in new small businesses. Training topics will include the safety and health of grain handling operations. Grantee plans to use existing training materials. Training will be offered in English.				
<b>University of Illinois, Board of Trustees of the</b>	Champaign	IL	\$155,000	Grain Handling Operations
Grantee proposes to provide 1-7.5 hours of grain handling operations training to 595 workers and employers in farm and grain industry. Target audience includes small business; workers in high-hazard industry; young workers; hard-to-reach workers; low-literacy; limited and limited English proficiency and temporary workers. Training topics will include train-the-trainer; safety and health hazards for farm workers and grain bin entry. Grantee plans to use existing training materials and develop an online course. Training will be offered in English.				
<b>Machine and Machine Guarding Hazards</b>	Los Angeles	CA	\$80,000	Machine and Machine Guarding Hazards
The grantee proposes to provide 2.75 hours of machinery and machine guarding hazards training to 210 garment workers. Target audience includes temporary workers, minority and other hard-to-reach workers, youth workers, and low-literacy or limited English proficiency workers. Training topics will include the recognition, prevention, and abatement of machine guarding hazards. Grantee plans to use previously developed materials. Training will be offered in English and Spanish.				
<b>Georgia Tech Research Corporation</b>	Atlanta	GA	\$153,591	Machine and Machine Guarding Hazards
The grantee proposes to provide 1 to 6 hours of machine guarding hazards in manufacturing training to 350 workers in small manufacturing businesses (e.g., poultry processing, metal fabrication, auto parts industry, and woodworking). The target population will be workers in high-hazards manufacturing with amputation hazards; temporary workers, minority workers and other hard-to-reach workers; non-literate, low-literacy, or limited English proficiency workers; young workers; and employers in new small businesses. Training topics will include machine guarding hazards in manufacturing. Grantee plans to use existing training materials and they will develop new materials. Training will be offered in English and a one-hour training module will be offered in Spanish.				
<b>Mohawk Valley Community College</b>	Utica	NY	\$114,996	Machine and Machine Guarding Hazards
The grantee proposes to provide 13 hours of machinery and machine guarding hazards training to 245 non-literate, low-literacy, or limited English proficiency workers, temporary workers, minority, or other hard-to-reach workers, workers and employers in high-hazard industries, workers and employers in new small business, young workers. Training topics will include basic methods of machine safeguarding and guard construction. Grantee plans to revise existing training materials. Training will be offered in English, Burmese, and Karen.				
<b>Nebraska Appleseed Center for Law in the Public Interest</b>	Lincoln	NE	\$82,000	Machine and Machine Guarding Hazards
The grantee proposes to provide 2 hours of machine guarding training to 328 workers in manufacturing and construction industry. Target audience includes high risk, high-hazard workers. Training topics will focus on machine guarding and amputation prevention. Grantee plans to use existing training materials. Training will be offered in English and Spanish.				
<b>New Jersey State AFL-CIO, Community Services Agency</b>	Trenton	NJ	\$154,844	Machine and Machine Guarding Hazards
The grantee proposes to provide 4 hours of machine guarding hazards and electrical hazards and controls training to 610 employees in the food manufacturing/distribution, dairy, retail stores, manufacturing, and warehousing. Target audience includes small businesses, limited English, young workers, temporary employees and high-hazard workers. Training topics will include machine guarding, hazardous energy control and electrical hazards. Grantee plans to use existing training materials. Training will be offered in English and Spanish.				

## 2017 Target Topic Training Grant Recipients (cont.)

<b>Northwestern University</b>	Evanston	IL	\$155,000	Machine and Machine Guarding Hazards
The grantee proposes to provide an online training system with which to supplement training of young workers on machinery and machine guarding hazards. The grantee proposes to provide 2 hours of machinery and machine guarding hazard training for young workers in schools and small businesses to 620 workers. Grantee will develop new training modules. Training will be offered in English.				
<b>Port of San Diego Ship Repair Association</b>	San Diego	CA	\$137,092	Machine and Machine Guarding Hazards
The grantee proposes to provide 3 to 10 hours of machinery and machine guarding hazards training to 334 maritime workers and employers. Target audience includes of non-literate, low-literacy, or limited English proficiency workers, temporary workers, minority, or other hard-to-reach workers, workers and employers in high-hazard industries, worker and employers in industries with high fatality rates. Grantee plans to use existing training materials and develop materials. Training will also be offered in Spanish.				
<b>Rutgers, The State University of New Jersey School of Management and Labor Relations</b>	Piscataway	NJ	\$154,949	Machine and Machine Guarding Hazards
The grantee proposes to provide 4 hours of machine guard hazard training to 350 workers employed by small to medium size warehouse, light-manufacturing and food processing employers. Target audience includes non-English speaking/limited English proficient, non-literate and low-literacy workers. Training topics will include machinery and machine guarding hazards in general industry. Grantee plans to use existing training materials. Training will be offered in English and Spanish.				
<b>United Auto Workers, International Union</b>	Detroit	MI	\$155,000	Machine and Machine Guarding Hazards
The grantee proposes to provide 2 to 8 hours of machine guarding training to 410 workers. Target audience includes non-literate, low-literacy, or limited English proficiency workers, temporary workers, minority, or other hard-to-reach workers, workers and employers in high-hazard industries, workers and employers in industries with high fatality rates and workers and employers in new small business, and young workers. Training topics will include machinery and machine guarding. Grantee plans to use existing training materials. Training will be offered in Spanish.				
<b>Alaska Native Tribal Health Consortium</b>	Anchorage	AK	\$153,877	Multiple Topics
