IMPLEMENT THE PLAN

Purpose

Implementation means more than simply exercising the plan during an emergency. It means acting on recommendations made during the vulnerability analysis, integrating the plan into company operations, training employees, conducting drills, and evaluating the plan. This module will present the critical aspects of integrating the emergency plan in participant’s business.

Concepts are reinforced in this step to help ensure application to business by:

- Reviewing sections of an emergency plan template and identifying resources that will help participants in completing an emergency plan for their business.
- Demonstrating an understanding of Step 4 by responding to questions posed at critical decision points in a case study on emergency planning.

Objectives

After completing this module, participants will be able to:

- Describe ways to integrate the emergency plan into their business operations.
- Recognize basic considerations for developing a training plan and conducting effective training:
  - Planning considerations
  - Training activities
  - Employee training
- Recognize issues to consider when conducting a formal audit of the emergency plan.
- Identify resources that will help them in completing sections of an emergency plan.
- Demonstrate an understanding of Step 4 by responding to questions posed at critical decision points in a case study on emergency planning.
- Identify 2 actions related to Step 4 to implement at your workplace, as well as potential barriers to these actions and how to overcome these barriers.
