Welcome…

…to Prevention Strategies for Electrical Hazards!

Today’s training program will provide you with an understanding and an awareness of basic electrical hazards and the requirements of an electrical safety program. This program is not designed to meet the standards of a “Qualified Person” under OSHA Subpart S or NFPA 70E.

Purpose

The purpose of this Program Introduction is to acquaint you with the facilitator, the training facility, the National Safety Council, the sponsoring Chapter and the other participants with whom you will share your learning goals. It provides a preview of the program purpose, content and materials.

Your Learning Experience

Your learning experience will be most effective if you actively participate in all program activities. To be an active participant and make this experience meaningful:

☐ Take part in program discussions.

☐ Assess electrical hazards and concerns at your business.

☐ Learn from each other. Stay in touch with other participants to learn from each other after this program.

☐ Ask questions when you are not clear on any points because an answer may be important later in the program.
Activity: Introduction and Learning Goals

Directions: You will be introducing yourself to your facilitator and colleagues. When you introduce yourself, provide the following information.

Your name:

Where you work:

What you do:

Your Learning Goal

State what you would most like to learn in this class today:
Program Goals and Agenda

This *Prevention Strategies for Electrical Hazards* training program will teach you to:

- Recognize the importance of identifying, evaluating and controlling common electrical hazards as a means of preventing deaths, injuries and illnesses.
- Recognize and correctly use key terms and concepts relating to electrical safety.
- Identify the four main types of electrical injuries.
- Recognize key elements of the OSHA Electrical Safety regulation.
- Recognize the NFPA 70E integration into OSHA Electrical Standards.
- Recognize the importance of electrical safety-related work practices.
- Differentiate between qualified and unqualified workers in order to identify appropriate training and protection requirements.
- Identify practices and procedures to protect employees who work on or near to electric conductors and equipment from the electrical hazards associated with this type of work.
