Confined Space Facts

Oxygen Deficiency

<6%  
Coma in 40 seconds, spasmodic breathing, convulsions, and death.

6-10%  
Nausea, vomiting, and unconsciousness; 8 minutes 100% fatal; 6 minutes, 50% fatal; 4-5 minutes, recovery with treatment.

12%  
Unconsciousness without warning, poor judgment, blue lips.

14-16%  
Accelerated breathing, increased heart rate, poor muscular coordination, fatigue, impaired perception and judgment.

17%  
Hypoxia symptoms, accelerated breathing and heart rate appear

19.5%  
Minimum permissible levels that work can be performed without respirators. Below this level, workers shall be required to wear supplied air respirators.

"This material was produced under Grant SH-21000-10-60-F-29 from the Occupational Safety and Health Administration, U.S. Department of Labor. It does not necessarily reflect the views or policies of the U.S. Department of Labor, nor does mention of trade names, commercial products, or organizations imply endorsement by the U.S. Government."
Hydrogen Sulfide Exposure

1000 ppm
Immediate respiratory arrest, loss of consciousness, followed by death

300 ppm
Loss of consciousness (approx. 20 min.)

100 ppm
Lose sense of smell

15 ppm
15 min. STEL (Short Term Exposure Limit)

A Short Term Exposure Limit (STEL) is defined by ACGIH (American Conference of Governmental Industrial Hygienists, Inc.) as the concentration to which workers can be exposed continuously for a short period of time without suffering from:
1. Irritation
2. Chronic or irreversible tissue damage
3. Narcosis of sufficient degree to increase the likelihood of accidental injury, impair self-rescue or materially reduce work efficiency.

10 ppm
8 hr. TWA (Total Weight Average) According to OSHA the 8-hour TWA PEL (Permissible Exposure Limit) is defined in the Federal Register, Vol. 57, No. 114, June 12 1992, pps 26539, 26556, 26572, 26573 and 26590 as follows: – “TWA is the employee's average airborne exposure in any 8-hour work shift of a 40-hour work week which shall not be exceeded.”

1 ppm
Smell of rotten egg

“This material was produced under Grant SH-21000-10-60-F-29 from the Occupational Safety and Health Administration, U.S. Department of Labor. It does not necessarily reflect the views or policies of the U.S. Department of Labor, nor does mention of trade names, commercial products, or organizations imply endorsement by the U.S. Government.”
Carbon Monoxide Exposure

4000 ppm
   Quickly fatal

2500 ppm
   Loss of consciousness after approximately 30 minutes

600 ppm
   Headache and discomfort after 1 hour

200 ppm
   Ceiling, faint signs of discomfort may begin to appear

35 ppm
   8 hr. TWA (Total Weight Average)
Confined Space Facts

Trench Rescue Facts:

Sheer wall collapse speed = 45 mph

1 cu/ft soil = 100 lbs.

24” soil on chest = 1,000 lbs.

Victim dies from inability to breath from weight on chest, not because face is covered.
