Small group exercise – Module 3

The number one potential for serious injury involving trim saws, sorting, bins, stacking and handling in a sawmill is **falling to a lower level**.

1. Select a leader for your small group.
2. Select a group member to write down the answers.

Your assignment is to identify three situations where someone has put themselves in danger of falling to a lower level at your facility while performing tasks involving trim saws, sorting, bins, stacking and handling. Your examples may include something you have done personally or something you have observed others doing. Do not include names or other identifying information in your examples.

Situation #1

What did they do to put themselves in danger?	
When do they put themselves in danger?	
Where do they put themselves in danger?	
Why do they put themselves in danger?	
How often does this occur?	
What can be done to correct the problem that causes them to put themselves in danger?
