

Flat Storage & Ground Piles Post-Questionnaire

Grain Handling Safety Coalition

www.grainsafety.org

Choose the **ONE** best answer.

1. “Unrestricted means of entry” is defined as:
 - a. Can step, walk, or drive through a ground level opening
 - b. Can step, walk, or drive through any opening
 - c. Entering at or above the level of the grain
 - d. Having a door large enough to drive through

2. What is **NOT** a criteria of flat storage?
 - a. Does not empty completely by gravity
 - b. Must be a building
 - c. Must enter to reclaim residual grain
 - d. Unrestricted, ground level entry

3. To meet the main criteria for flat storage entry under 1910.272 paragraph (h) the entry must be through an unrestricted ground level opening **AND** there are:
 - a. No hazards present
 - b. No entanglement hazards present
 - c. No engulfment hazards are present.
 - d. No atmospheric hazards present

4. What would not usually be a potential hazard in a flat storage space?
 - a. Toxic Gases
 - b. Low visibility due to dust
 - c. Fall through floor opening
 - d. Entrapment or engulfment hazards
