

Flat Storage & Ground Piles Pre-Questionnaire

Grain Handling Safety Coalition

www.grainsafety.org

Choose the **ONE** best answer.

1. What is **NOT** a criteria of flat storage?

- a. Must be a building
- b. Does not empty completely by gravity
- c. Unrestricted, ground level entry
- d. Must enter to reclaim residual grain

2. What would not usually be a potential hazard in a flat storage space?

- a. Entrapment or engulfment hazards
- b. Low visibility due to dust
- c. Toxic Gases
- d. Fall through floor opening

3. To meet the main criteria for flat storage entry under 1910.272 paragraph (h) the entry must be through an unrestricted ground level opening **AND** there are:

- a. No engulfment hazards are present.
- b. No atmospheric hazards present.
- c. No entanglement hazards present.
- d. No hazards present.

4. “Unrestricted means of entry” is defined as:

- a. Having a door large enough to drive through
- b. Can step, walk, or drive through any opening
- c. Can step, walk, or drive through a ground level opening
- d. Entering at or above the level of the grain
