

# Training

## Construction Hazards

Rural utility workers are exposed to a variety of workplace hazards. At this training you will have the opportunity to learn how to protect yourself from workplace hazards including:

- Excavation, electrical and fall hazards

## Bureau of Labor Statistics 2016 data

- In 2016, the number of excavation fatalities was nearly double the national average from each of the previous five years
- The number of fall fatalities increased by 40 percent
- The number of electrical fatalities and injuries increased by 8 percent

## The Importance of Construction Safety and Health Training

Up to seven hours of safety training to water treatment plant operators, construction laborers and tradespeople; rural utility operations specialists; village administrators; and village environmental coordinators.

Upon completion of this training participants will learn how to anticipate, recognize, evaluate and control excavation, electrical and fall hazards.

***As a result the training you will:***

*Increase awareness of excavation, electrical and fall hazards.*

*Reduce lost time from workplace injuries and illnesses*

*Know your rights under the Occupational Safety and Health Act.*
