SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier
   Trade name
   MyProduct - SDS example, not valid for use
   Product no. 
   Produkt 123456
   REACH registration number
   Not applicable

1.2. Relevant identified uses of the substance or mixture and uses advised against
   Relevant identified uses of the substance or mixture
   Laboratory Chemicals (PC 21)
   Use as laboratory reagent (PROC 15)
   Scientific research and development (SU 24)
   Wide dispersive indoor use of processing aids in open systems (ERC8a )
   Uses advised against
   -
   The full text of any mentioned and identified use categories are given in section 16

1.3. Details of the supplier of the safety data sheet
   Company and address
   CHYMEIA ApS
   Universitetsparken 2
   DK-4000 Roskilde
   tlf: +45 7240 1622
   Contact person
   Salgschef, Lars Bugge
   E-mail
   info@chymeia.com
   SDS date
   2016-02-23
   SDS Version
   1.0

1.4. Emergency telephone number
   Use your national or local emergency number
   See section 4 “First aid measures”

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture
   Flam. Liq. 2; H225
   Asp. Tox. 1; H304
   Skin Irrit. 2; H315
   Eye Irrit. 2; H319
   STOT SE 3; H336
   Repr. 2; H361
   STOT RE 1; H372
   See full text of H-phrases in section 2.2.
2.2. Label elements

Hazard pictogram(s)

Signal word
Danger

Hazard statement(s)
Highly flammable liquid and vapour. (H225)
May be fatal if swallowed and enters airways. (H304)
Causes skin irritation. (H315)
Causes serious eye irritation. (H319)
May cause drowsiness or dizziness. (H336)
Suspected of damaging fertility or the unborn child. (H361)
Causes damage to organs through prolonged or repeated exposure. (H372)

General
- Obtain special instructions before use. (P201).
- Do not breathe mist/vapours/fume/spray. (P260).

Prevention
- Get medical advice/attention if you feel unwell. (P314).
- IF SWALLOWED: Immediately call a POISON CENTER/doctor. (P301+P310).

Response
- Store locked up. (P405).
- Dispose of contents/container to an approved waste disposal plant. (P501).

2.3. Other hazards
This product contains teratogenic substances, which can cause long-term damage to the human embryo.
This product contains substances that can give chemical pneumonia if inhaled. The symptoms of chemical pneumonia can appear after several hours.
The product contains substances that can damage the reproductive system.
This product contains an organic solvent. Repeated exposure to organic solvents can result in damage to the nervous system and inner organs, such as the liver and kidneys.

Additional labelling
- 

Additional warnings
- 

VOC
- 

SECTION 3: Composition/information on ingredients

3.1/3.2. Substances/Mixtures

| NAME: | toluene |
| IDENTIFICATION NOS.: | CAS: 108-88-3 EC-no: 203-625-9 REACH-no: 01-2119471310-51-xxxx Index-no: 601-021-00-3 |
| CONTENT: | 80-95% |
| NOTE: | S |

| NAME: | styrene |
| IDENTIFICATION NOS.: | CAS: 100-42-5 EC-no: 202-851-5 REACH-no: 01-2119457861-32-xxxx Index-no: 601-026-00-0 |
| CONTENT: | 10-15% |
| CLP CLASSIFICATION: | Flam. Liq. 3, Acute Tox. 4, STOT RE 1, STOT SE 3, Skin Irrit. 2, Eye Irrit. 2, Asp. Tox. 1, Repr. 2, Aquatic Chronic 3 |
According to EC-Regulation 1907/2006 (REACH)

H226, H304, H315, H319, H332, H335, H361, H372, H412

NOTE:

(*) See full text of H-phrases in chapter 16. Occupational exposure limits are listed in section 8, if these are available.

S = Organic solvent

Other informations

ATEmix(inhale, vapour) > 20
Eye Cat. 2 Sum = Sum(Ci/S(G)CLi) = > 1 - 1.2
Skin Cat. 2 Sum = Sum(Ci/S(G)CLi) = 8 - 12
N chronic (CAT 4) Sum = Sum(Ci/M(chronic)i*25*0.1*10^CAT4) = 0.32 - 0.48

4.1. Description of first aid measures

General information
In the case of accident: Contact a doctor or casualty department – take the label or this safety data sheet. Contact a doctor, if in doubt about the injured person's condition or if the symptoms continue. Never give an unconscious person water or similar.

Inhalation
Get the injured person into fresh air. Make sure there is always someone with the injured person. Prevent shock by keeping the injured person warm and calm. If the person stops breathing, give mouth-to-mouth resuscitation. If unconscious, roll the injured person onto side with the top leg bent at both knee and hip. Call an ambulance.

Skin contact
Remove contaminated clothing and shoes at once. Skin that has come in contact with the material must be washed thoroughly with water and soap. Skin cleanser can be used. DO NOT use solvents or thinners.

Eye contact
Remove contact lenses and open eyes widely. Flush eyes with water or saline water (20-30°C) for at least 15 minutes. Seek medical assistance and continue flushing during transport.

Ingestion
In the case of ingestion, contact a doctor immediately and take this safety data sheet or the label from the material with you. If the person is conscious, give them water. DO NOT try to induce vomiting, unless this is recommended by a doctor. Hold head facing down so that no vomit runs back into the mouth and throat. Prevent shock by keeping the injured person warm and calm. Give mouth-to-mouth resuscitation if breathing stops. If unconscious, roll the injured person onto side with the top leg bent at both knee and hip. Call an ambulance.

Do not induce vomiting! If vomiting occurs, keep head facing down so that vomit does not get into the lungs. Call a doctor or ambulance. Symptoms of chemical pneumonia can appear after several hours. People who have swallowed the product should therefore be kept under medical attention for at least 48 hours.

Burns
Rinse with water until the pain stops and continue for 30 minutes.

4.2. Most important symptoms and effects, both acute and delayed

Reproductive toxicity: This product contains teratogenic substances which can do long-term damage to human offspring. The effects on the child can be: death, deformity, delayed development, and functional disorders.

This product contains substances that can give chemical pneumonia if inhaled. The symptoms of chemical pneumonia can appear after several hours.

Reproductive toxicity: This product contains substances which can do damage to reproductive capacity, e.g. damage to germ cells or hormonal regulation. The effects can be: sterility, reduced fertility, menstruation disorders, etc.

Neurotoxic effect: This product contains organic solvents, which can have an effect on the nervous system. Symptoms of neurotoxicity can be: loss of appetite, headache, dizziness, whistling in the ears, tingling sensations in the skin, sensitivity to the cold, cramps, difficulty in concentrating, tiredness, etc.

Repeated exposure to solvents can result in the breaking down of the skin's natural fat layer. The skin will then be more prone to absorb dangerous substances, e.g. allergens.

Irritation effects: This product contains substances which cause irritation to skin and eyes, or when inhaled. Contact with locally irritative substances can cause the area of contact to be more prone to absorb damaging substances such as allergens.
According to EC-Regulation 1907/2006 (REACH)

### 4.3. Indication of any immediate medical attention and special treatment needed

- IF exposed or concerned: Get immediate medical advice/attention.

**Information to medics**
- Bring this safety data sheet.

### S

#### 5.1. Extinguishing media

- Recommended: alcohol-resistant foam, carbonic acid, powder, water mist. Water jets should not be used, since they can spread the fire.

#### 5.2. Special hazards arising from the substance or mixture

- If the product is exposed to high temperatures, as in the case of fire, dangerous catabolic substances are produced. These are: Carbon oxides. Fire will result in thick black smoke. Exposure to catabolic products can damage your health. Fire fighters should use proper protection gear. Closed containers, which are exposed to fire, should be cooled with water. Do not let fire-extinguishing water run into sewers and other water courses.

#### 5.3. Advice for firefighters

- Wear self-contained breathing apparatus and protective clothing to prevent contact.

### S

#### 6.1. Personal precautions, protective equipment and emergency procedures

- Avoid inhalation of vapours from waste material. Avoid direct contact with spilled substances. Stores that have not ignited must be cooled by water mist. Where possible, remove flammable materials. Make sure there is sufficient ventilation.

#### 6.2. Environmental precautions

- Avoid discharge to lakes, streams, sewers, etc. In the event of a leakage to the surroundings, contact the local environmental authorities. Consider putting up waste collecting trays/basins to prevent leakage to the surroundings.

#### 6.3. Methods and material for containment and cleaning up

- Use sand, sawdust, earth, vermiculite, diatomaceous earth to contain and collect non-combustible absorbent materials and place in container for disposal, according to local regulations. Solvents should be avoided.

#### 6.4. Reference to other sections

- See section on “Disposal considerations” with regard to the handling of waste. See section on 'Exposure controls/personal protection' for protective measures.

### SECTION 7: Handling and storage

#### 7.1. Precautions for safe handling

- Avoid static electricity. Protect electrical equipment in accordance with current norms. To divert static electricity during transmission, containers must be grounded and connected by wire with the receiving containers. Do not use spark-forming tools. Smoking, consumption of food or liquid, and storage of tobacco, food or liquids are not allowed in the workrooms. See section on ‘Exposure controls/personal protection' for information on personal protection. Avoid direct contact with the product.

#### 7.2. Conditions for safe storage, including any incompatibilities

- Always store in containers of the same material as the original. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Must be stored in a cool and ventilated area, away from possible sources of combustion. Beware, this chemical can form peroxides. The content of peroxide must be controlled regularly after opening for example every 6th month.

**Storage temperature**
- Room temperature 18 to 23°C

#### 7.3. Specific end use(s)

- This product should only be used for applications described in Section 1.2
According to EC-Regulation 1907/2006 (REACH)

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

OEL

- **Styrene (EH40, 2005)**
  - Long-term exposure limit (8-hour TWA reference period): 100 ppm | 430 mg/m³
  - Short-term exposure limit (15-minute reference period): 250 ppm | 1080 mg/m³

- **Toluene (EH40, 2005)**
  - Long-term exposure limit (8-hour TWA reference period): 50 ppm | 191 mg/m³
  - Short-term exposure limit (15-minute reference period): 100 ppm | 384 mg/m³
  - Comments: Sk (Sk = Can be absorbed through skin.)

DNEL / PNEC

- **DNEL (toluene):** 384 mg/m³
  - Exposure: Inhalation
  - Duration of Exposure: Short term – Systemic effects - Workers

- **DNEL (toluene):** 343 mg/m³
  - Exposure: Inhalation
  - Duration of Exposure: Short term – Local effects - Workers

- **DNEL (toluene):** 192 mg/m³
  - Exposure: Inhalation
  - Duration of Exposure: Long term – Systemic effects - Workers

- **DNEL (toluene):** 192 mg/m³
  - Exposure: Inhalation
  - Duration of Exposure: Long term – Local effects - Workers

- **DNEL (toluene):** 384 mg/kgbw
  - Exposure: Dermal
  - Duration of Exposure: Long term – Systemic effects - Workers

- **DNEL (toluene):** 226 mg/m³
  - Exposure: Inhalation
  - Duration of Exposure: Short term – Systemic effects - General population

- **DNEL (toluene):** 226 mg/m³
  - Exposure: Inhalation
  - Duration of Exposure: Short term – Local effects - General population

- **DNEL (toluene):** 56,5 mg/m³
  - Exposure: Inhalation
  - Duration of Exposure: Long term – Systemic effects - General population

- **DNEL (toluene):** 8,13 mg/kgbw
  - Exposure: Oral
  - Duration of Exposure: Long term – Systemic effects - General population

- **DNEL (toluene):** 226 mg/kgbw
  - Exposure: Dermal
  - Duration of Exposure: Long term – Systemic effects - General population

8.2. Exposure controls

Compliance with the stated exposure limits values should be checked on a regular basis.

**General recommendations**

- Observe general occupational hygiene.

**Exposure scenarios**

- If there is an appendix to this safety data sheet, the indicated exposure scenarios must be complied.

**Exposure limits**

- Trade users are covered by the rules of the working environment legislation on maximum concentrations for exposure. See work hygiene threshold values above.

**Appropriate technical measures**

- Airborne gas and dust concentrations must be kept as low as possible and below the current threshold values (see above). Use for example an exhaust system if the normal air flow in the work room is not sufficient. Make sure that eyewash and emergency showers are clearly marked.
According to EC-Regulation 1907/2006 (REACH)

**Hygiene measures**
Whenever you take a break in using this product and when you have finished using it, all exposed areas of the body must be washed. Always wash hands, forearms and face.

**Measures to avoid environmental exposure**
Keep damming materials near the workplace. If possible collect spillage during work.

**Individual protection measures, such as personal protective equipment**

- **Generally**
  Use only CE marked protective equipment.

- **Respiratory Equipment**
  Recommended: A. Class 2 (medium capacity). Brown

- **Skin protection**
  Use suitable protective clothing, which is of EN-approved type 6 and Category III.

- **Hand protection**
  Recommended: Nitrile rubber. Breakthrough time: > 480 minutes (Class 6)

- **Eye protection**
  Use safety glasses with a side shield.

### SECTION 9: Physical and chemical properties

#### 9.1. Information on basic physical and chemical properties

<table>

**Phase changes**
- Melting point (°C): -95
- Boiling point (°C): 110
- Vapour pressure: 29 hPa

**Data on fire and explosion hazards**
- Flashpoint (°C): 4
- Ignition (°C): 535
- Self ignition (°C): No data available.
- Explosion limits (Vol %): 1.2 - 8

**Solubility**
- Solubility in water: Insoluble
- n-octanol/water coefficient: 2.65
- Solubility in fat (g/L): No data available.

#### 9.2. Other information

**SECTION 10: Stability and reactivity**

10.1. Reactivity
No data available

10.2. Chemical stability
The product is stable under the conditions, noted in the section on “Handling and storage”.

10.3. Possibility of hazardous reactions
No special

10.4. Conditions to avoid
Avoid static electricity. Do not expose to heat (e.g. sunlight), because it can lead to excess pressure.
10.5. Incompatible materials
Strong acids, strong bases, strong oxidizing agents, and strong reductants agents.

10.6. Hazardous decomposition products
The product is not degraded when used as specified in section 1.

SECTION 11: Toxicological information

Skin corrosion/irritation
Causes skin irritation.

Serious eye damage/irritation
Causes serious eye irritation.

Respiratory or skin sensitisation
No data available.

Germ cell mutagenicity
No data available.

Carcinogenicity
No data available.

Reproductive toxicity
Suspected of damaging fertility or the unborn child.

STOT-single exposure
May cause drowsiness or dizziness.

STOT-repeated exposure
Causes damage to organs.

Aspiration hazard
May be fatal if swallowed and enters airways.

Long term effects
Reproductive toxicity: This product contains teratogenic substances which can do long-term damage to human offspring. The effects on the child can be: death, deformity, delayed development, and functional disorders. This product contains substances that can give chemical pneumonia if inhaled. The symptoms of chemical pneumonia can appear after several hours.
Reproductive toxicity: This product contains substances which can do damage to reproductive capacity, e.g. damage to germ cells or hormonal regulation. The effects can be: sterility, reduced fertility, menstruation disorders, etc.
Neurotoxic effect: This product contains organic solvents, which can have an effect on the nervous system. Symptoms of neurotoxicity can be: loss of appetite, headache, dizziness, whistling in the ears, tingling sensations in the skin, sensitivity to the cold, cramps, difficulty in concentrating, tiredness, etc. Repeated exposure to solvents can result in the breaking down of the skin's natural fat layer. The skin will then be more prone to absorb dangerous substances, e.g. allergens.
Irritation effects: This product contains substances which cause irritation to skin and eyes, or when inhaled. Contact with locally irritative substances can cause the area of contact to be more prone to absorb damaging substances such as allergens.

12.4. Mobility in soil
- styrene : Log Koc= 2.422424, Calculated from LogPow (Moderate mobility potential.).
- toluene : Log Koc= 2.15 (Moderate mobility potential.).

12.5. Results of PBT and vPvB assessment
No data available

12.6. Other adverse effects
This product contains substances which can cause undesirable long-term effects in the water environment, due to its poor biodegradability.

SECTION 13: Disposal considerations

13.1. Waste treatment methods
The product is covered by the regulations on dangerous waste.

Waste
- EWC code
- Specific labelling
- Contaminated packing
Packaging which contains leftovers from the product must be disposed of in the same way as the product.

14.1 – 14.4
This product is covered by the conventions on dangerous goods.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

Restrictions for application
People under the age of 18 must not be exposed to this product cf. Council Directive 94/33/EC. Pregnant and nursing women must not be exposed to the effects of this product. The risk, and possible technical precautions or design of the workplace to avoid such risk, must therefore be evaluated.

Demands for specific education
- 

Additional information
