 MANAGEMENT LEADERSHIP

Communicate Your Commitment to a Safety and Health Program

<table>
<thead>
<tr>
<th>Step 1. Build your case for a safety and health program</th>
<th>Step 2. Write a safety and health policy</th>
</tr>
</thead>
<tbody>
<tr>
<td>Safety and health programs are a proven way to prevent workplace injuries, illnesses, and deaths. For the program to be effective, everyone in your business should understand why improving safety and health is important. How can you build this understanding throughout your business’? Begin by choosing a few people or one person if you are a small business to help you. You will work with this team to build your case for a safety and health program and carry the message to everyone else. They should be people who can help you drive change within the business. Consider choosing people, both workers and managers, who represent different areas of the business, shifts, and facilities. You want to learn about motivations for improving safety at every level.</td>
<td>To Do</td>
</tr>
<tr>
<td>Form a small team of “safety champions”—people who can help you form your safety and health program and drive change in your business.</td>
<td></td>
</tr>
<tr>
<td>Assess the reasons your business needs a safety and health program.</td>
<td></td>
</tr>
</tbody>
</table>
