

OSHA REGIONAL INSTRUCTION

U.S. DEPARTMENT OF LABOR

Occupational Safety and Health Administration

DIRECTIVE NUMBER: CPL 20/02 (CPL 04) | **EFFECTIVE DATE:** October 1, 2019

SUBJECT: Regional Emphasis Program (REP) for Landscaping and Horticultural Services

REGIONAL IDENTIFIER: Region IV

ABSTRACT

Purpose: The purpose of this instruction is to renew a Regional emphasis program to reduce workplace fatalities in the Landscaping and Horticultural Services industry (NAICS 541320, 541690, and 561730)

Scope: This Notice applies to all Federal OSHA Area Offices in Region IV

References: [OSHA Instruction CPL 02-00-025, Scheduling System for Programmed Inspections](#), January 4, 1995.
[OSHA Instruction CPL 04-00-002, Procedures for Approval of Local Emphasis Programs \(LEPs\)](#), November 13 2018
[OSHA Instruction CPL 02-00-163, Field Operations Manual \(FOM\)](#), September 13, 2019

Cancellation: CPL 19/02; October 1, 2018—Regional Emphasis Program for Landscaping and Horticultural Services

State Impact: None

Action Offices All Federal OSHA Area Offices

Originating Office: Atlanta Regional Office

Contact: Christi Griffin, Assistant Regional Administrator Enforcement Programs, 678-237-0400

By and Under the Authority of:

KURT A. PETERMEYER
Regional Administrator

Executive Summary

This instruction renews a Regional Emphasis Program (REP) to reduce fatalities in the Landscape and Horticultural Services Industry. The REP ensures effective targeting, enforcement and outreach for hazardous working conditions that occur during landscaping work.

- I. **Purpose:** To reduce the fatal accidents rate for Landscaping and Horticultural Services
- II. **Scope:** All Federal Area Offices
- III. **References:**
 - U. S. Census Bureau's 2002 Economics Census: Table 1, Advance Summary Statistics for the United States
 - U. S. Department of Labor, Bureau of Labor Statistics: Fatal Occupational Injuries 2002
 - OSHA's Industry Profile for Industry Group 078, Landscape and Horticultural Services
 - OSHA's IMIS Micro to Host Reports: Special Fatality Reports for SIC Code Ranges: 0781-0783, October 1, 1997 to September 30, 2003
 - [OSHA Instruction CPL 02-00-025, Scheduling System for Programmed Inspections](#), January 4, 1995.
 - [OSHA Instruction CPL 04-00-002, Procedures for Approval of Local Emphasis Programs \(LEPs\)](#), November 13 2018
 - [OSHA Instruction CPL 02-00-163, Field Operations Manual \(FOM\)](#), September 13, 2019
 - U. S. Department of Labor, Bureau of Labor Statistics: Occupational Injuries/Illnesses and Fatal Injuries Profiles – Landscaping services
- IV. **Cancellation:** CPL 19/02; October 1, 2018–Regional Emphasis Program for Landscaping and Horticultural Services
- V. **Expiration:** This instruction expires four years from the effective date, unless extended.
- VI. **Action:** OSHA compliance personnel shall follow the procedures contained in this notice when conducting outreach and enforcement activities.
- VII. **Background:**

Landscaping activities include mowing lawns; weed trimming; planting flowers, shrubs and trees; and trimming hedges and trees. Landscaping businesses will often fertilize plants and grounds, as well. Employees are exposed to multiple hazards when performing these activities, such as, falls, electrical, struck-by, etc. Employees can be injured or killed when utilizing landscaping equipment, e.g., mowing with zero-turn lawnmowers on slopes or trimming trees near overhead power lines.

From FY-13 to FY-17, Federal and State OSHA investigated 297 work related fatal accidents in landscaping. A large percentage of these accidents occurred in Region IV. For this period, there are 84 fatal landscaping accidents (28%) listed for Region IV. Of these 84 fatal accidents, 63 of them occurred in the four federal OSHA enforcement states, Alabama, Florida, Georgia, and Mississippi. In these four states, the majority of the accidents occurred in Florida, 82.5%.

The four leading causes of these accidents were listed as struck by (36%), falls from elevations (22%), caught in or between (21%) and electrical shock (19%).

According to 2017 BLS data, the total incidence rate in Landscaping Services (4.0) was 1.43 times more than all of Private Industry (2.8). Additionally, the rate for cases with days away from work (2.4) was 1.6 times more than all of Private Industry (1.5). Further, 206 of the 326 building and grounds cleaning and maintenance worker deaths occurred in landscaping services. Of the 713 fatalities that resulted from falls to a lower level, 8.7% occurred in landscaping services. Also in landscaping services, 11.03% of all fatalities occurred as the result of exposure to electricity.

In FY-18, Region IV conducted 69 inspections of landscaping operations, and 18 of those were fatality investigations. Region IV also investigated 8 employer reported referrals. Of the 26 inspections with violations, 86% of them resulted in serious violations. Additionally, 76.1% of all violations were determined to be serious.

VIII. Program Procedures:

- A. Compliance Safety and Health Officers (CSHOs) shall, while traveling during the course of their work-day, be watchful for work activities where employees may be exposed to hazardous conditions while doing landscape/horticultural type work. The compliance officer seeing such work activity shall attempt to contact the area office to obtain authorization from the Area Director or Team Leader to begin an immediate inspection/intervention. Approval to start an inspection/intervention will normally be granted to the CSHO provided that this activity does not conflict with higher priority inspection activity.
- B. If the CSHO has no readily available means to contact the area office, or is otherwise unable to reach area office personnel who can authorize the inspection/intervention, the CSHO will initiate either a limited scope inspection or an intervention provided this activity will not interfere with higher priority inspections or assignments. The CSHO will give highest priority to preventing further employee exposure to the hazards observed. The CSHO shall notify the area office management of the inspection/intervention as soon as possible.
- C. Whenever an inspection is begun under this REP, the CSHO will include in the case file narrative a description of the circumstances which resulted in discovery of the work activity that was the basis of the inspection. In cases where authorization was not obtained, an explanation shall be included as to the circumstances.

IX. Recording in OIS:

Current instructions for completing the appropriate inspection classification boxes shall be applied when recording inspections conducted under the REP as follows:

- A. The Inspection Form, under the Inspection Type Tab for a programmed inspection conducted under this regional emphasis program shall be marked "Planned" and "Local Emphasis Program". The CSHO shall record "LANDSCAPE" from the LEP drop down menu for proper coding. CSHO self-referrals are to be recorded as programmed inspections. Complaints, referrals from sources such as police departments or fire departments, fatality/catastrophe, and follow-up inspections shall be appropriately recorded as

unprogrammed inspection activity, marked "Local Emphasis Program" and coded "LANDSCPE".

- B. Upon entry, if it is determined the employees are not exposed to hazards and/or adequate precautions were taken to protect employees, the Inspection Form shall be coded "no inspection". The Inspection Form shall also be coded as described in paragraph VIII. A. and a brief statement shall be included with the case file to explain why an inspection was attempted and the circumstances resulting in a "No Inspection" occurring. In addition, a Compliance Assistance Activity Form will be completed to account for the Compliance Assistance time spent on site with the employer. A copy of the completed Compliance Assistance Activity Form must be placed in the case file for future reference. Area Directors shall account for all intervention activities by generating a report that lists the Compliance Assistance Activity Form related to this Regional Emphasis Program.

X. Outreach:

Each Area Director will ensure that outreach activities are conducted to reach as many stakeholders as possible. Outreach is for the purpose of informing interested parties of the existence, purpose and objectives of this regional emphasis program, as well as to promote employer and employee awareness of hazards associated with landscaping.

- XI. Evaluation:** An evaluation of the program will be conducted midway through and at the completion of the effective period that addresses whether or not the program advances OSHA's goals and initiatives and will include quantitative and qualitative measures.
