ABSTRACT

Purpose: This Instruction renews a Regional Emphasis Program (REP) to reduce the incidence of serious injuries and fatalities during roadway work zone construction activities in accordance with OSHA’s Operating Plan.

Scope: This Instruction applies to work zone construction activities in the jurisdiction of the Federal Area Offices in Region VIII.

Reference: OSHA Instruction CPL 04-00-002, Procedures for Approval of Local Emphasis Program (LEPs), November 13, 2018.

Cancellations: This Instruction cancels Regional Notice 19-02, CPL 04-01, October 1, 2018, Regional Emphasis Program for Roadway Work Zone Activities.

State Impact: None

Action Offices: Billings, Bismarck, Sioux Falls, Denver, and Englewood Area Offices

Originating Office: Denver Regional Office

Contact: Assistant Regional Administrator/Federal State Operations
Cesar Chavez Building

By and Under the Authority of:

________________________________________
Rita Lucero
Acting Regional Administrator, VIII
Executive Summary

Workers employed in the road construction industry face many hazards that can lead to serious injury, illness, and death. Incidents involving vehicles (both motorists and construction vehicles) are the main cause of occupational fatalities in this industry. Other hazards include fall from height, overexertion and struck by objects other than vehicles.

The intent of this renewed Regional Emphasis Program is to encourage employers to take steps to address these hazards, ensure work sites are evaluated to determine if the employer is in compliance with all relevant OSHA requirements, and to help employers correct hazards, thereby reducing potential injuries, illnesses, and death for their workers.

OSHA in Region VIII proposes to accomplish this through outreach and enforcement activities. Outreach activities have and will continue to include seminars and training sessions with stakeholders, electronic information sharing activities through newsletters, and cooperative program agreements with industry associations. Enforcement activities will include, but not be limited to, the inspection of road construction work sites with review of traffic control plans and safety and health programs in order to identify and obtain corrections of workplace hazards at all applicable inspection sites.

I. **Purpose:** The purpose of this Instruction is to renew a Regional Emphasis Program (REP) for the programmed inspections of roadway work zones in accordance with the provisions of OSHA Instruction CPL 04-00-002, Procedures for Approval of Local Emphasis Programs (LEPs).

II. **Scope:** This Instruction applies to all street and highway work zones within each Area Office’s jurisdiction within Region VIII.

III. **Expiration:** This Instruction expires September 30, 2024.

IV. **Action:** OSHA Region VIII compliance personnel shall follow the procedures contained in this instruction when conducting outreach and enforcement activities.

V. **References:**

   A. OSHA Instruction CPL 02-00-163, *Field Operations Manual (FOM)*, September 13, 2019, or the most recent version at the time of the inspection opening conference.

   B. OSHA Instruction CPL 04-00-002, *Procedures for Approval of Local Emphasis Program (LEPs)*, November 13, 2018.

   C. OSHA Instruction CPL 02-00-025, *Scheduling System for Programmed Inspections*, January 4, 1995.

   F. OSHA Instruction CPL 02-00-051, *Enforcement Exemptions and Limitations under the Appropriations Act, May 28, 1998; Appendix A*, December 18, 2018, or the most recent version at date of inspection opening conference.

VI. **Cancellation:** This Instruction cancels Regional Notice 19-02, CPL 04-01, October 1, 2018, Regional Emphasis Program for Roadway Work Zone Activities.

VII. **Action Office:** Billings, Bismarck, Sioux Falls, Denver, and Englewood Area Offices

VIII. **Background:** Each year, more workers die in the construction industry than in any other
sector. The goal of the REP, through direct intervention, is to both educate employers and employees about work zone hazards and reduce occupational fatalities, injuries, and illness that are occurring in roadway work zones.

The National Work Zone Safety Information Clearinghouse reports that highway and street construction workers are at risk of fatal and serious nonfatal injury when working in the vicinity of passing motorists, construction vehicles, and equipment. Each year, hundreds of workers are killed and thousands are injured in the highway and street construction industry. In 2017, one-hundred and thirty-two workers were fatally injured nationwide while performing work zone duties. This is a slight increase from the previous three year average of one-hundred and thirty. According to current data from the Clearinghouse, thirty-four employees were fatally injured in Region VIII between 2007 and 2017. In addition to the fatal events described above, serious non-fatal injuries also occur in highway construction due to overexertion, falls, and being struck by other objects. 2017 BLS data showed 68 fatalities occurred in NAICS 237310, Highway, Street and Bridge Construction, relating to work zone activities.

IX. Inspection Scheduling:

A. Selection of Sites for inspection: Due to the unique and variable conditions associated with roadway construction, each area office will select sites for inspection in a particular manner as set forth below. (Each area office will also, however, select sites for inspection pursuant to paragraph VIII.B. below.)

1. Denver (DAO) and Englewood (EAO) Offices: The Area Director will, as resources allow, develop a list of roadway work zone sites within the Area Office’s jurisdiction. The list will be developed from the Colorado Department of Transportation (CDOT) Home Page http://www.coloradodot.info/ of Scheduled Lane/Road Closures. The Current Condition Page www.coloradodot.info/travel/scheduled-lane-closures.html provides access to the most recent information about conditions on Colorado’s highways, including a “week at a time” schedule of Lane/Road Closures.

When an inspection cycle list is needed the Area Director will determine the number of work sites that will be included in the cycle. The Area Director will then compile a list that includes all the roadway work sites then found on the above DOT lists by quadrant. The compiled list of roadway work zone sites will be reviewed and all sites that are outside the area office’s territorial jurisdiction will be deleted.

A random numbers table will then be applied to create a list of work sites in accordance with the November 12, 2014, Memorandum: Establishments-Targeting Lists for Emphasis Programs. The Area Director will then select from the randomized list the number of sites required for the inspection cycle. The selected sites will be scheduled for inspection. All selected sites will be inspected, unless the deletion criterion (described below) applies to a selected
site. (The Denver and Englewood Area Offices will also inspect certain
additional sites as described in paragraph VIII.B. below.)

2. **Billings, Bismarck, and Sioux Falls Area Offices:** The Billings, Bismarck,
   and Sioux Falls Area Offices will select worksites for inspection based on the
   selection method set forth in paragraph VIII.B. below (CSHO observation of a
   serious hazard in a roadway work zone).

   B. **Sites also to be inspected whenever a serious hazard is observed.** (This is the
   primary selection method for the Billings, Bismarck, and Sioux Falls Area Offices,
   and is an additional selection method for all other area offices.) Each Area Office
   will also select worksites for inspection based on a Compliance Safety and Health
   Officer’s (CSHO’s) observation of a serious hazard in a roadway work zone. If, in
   the normal course of travels, a CSHO observes a serious hazard during work activities
   in the roadway within the Area Office’s jurisdiction, the CSHO will call the Area
   Office to inform the Area Director or other supervisor of their intent to conduct the
   inspection.

   C. **Additions:** Additions to all lists generated will be made in accordance with
   November 12, 2014 OSHA Memorandum Subject: Establishments-Targeting Lists
   for Emphasis Programs.

   D. **Deletions:** Each area office will maintain a list of sites that are inspected. Before
   directing an inspection pursuant to section VIII.A, above, the Area Director will
   determine whether the subject site has had a programmed inspection within the last
   90 days. If so, that site will not be the subject of a programmed inspection during the
   current cycle unless a serious hazard is observed, in which case, an inspection will be
   authorized. Any work zone site on a current cycle that has not been inspected by the
   time this notice expires shall be included in the alphabetical list generated the
   following year, provided this notice is renewed for the following fiscal year and such
   work zone is still in existence.

X. **Inspection Procedures:**

   A. Only those CSHO’s who have been trained in the recognition and abatement of
   hazards specific to the roadway work zones will be assigned to lead these inspections.

   B. Designated CSHOs will be provided with and use appropriate PPE, including high
   visibility vests and amber safety lights.

XI. **Outreach:** The Area Offices have conducted and will continue to provide outreach on
   hazards in the highway, street and bridge construction industry. Outreach has been in the
   form of speeches, training seminars, and newsletters to groups identified by the
   Compliance Assistance Specialist (CAS) and CSHOs.

XII. **OIS Coding:** Inspections conducted under this REP will be identified in the OSHA
Information System (OIS) as follows:

A. Current instructions for completing the appropriate inspection classification boxes on the OIS Inspection Form will be followed.

B. Inspections which are targeted as a result of this REP will be coded as “WORKZONE” in the Local Emphasis Program block and as “Programmed Planned” in the Initiating Type block.

C. Inspections involving work zone safety issues which are initiated as a result of a complaint, referral by another agency, fatality/catastrophe or other programmed activity will be coded as “WORKZONE” in the Local Emphasis Program block, and as the appropriate unprogrammed activity in the Initiating Type block.

XIII. **Program Report:** No later than midway through the life of the program the Area Offices will provide a report of this REP to the Regional Office.

**DISTRIBUTION:**
- Directorate of Enforcement Programs
- Directorate of Construction Programs
- Regional Office of the Solicitor
