

1. Whenever a visit is made in response to the NEP, Consultation Request and/or Visit forms are to be completed as follows:

"National Emphasis Program," Item No. 25, when a request is being scheduled in response to the NEP.

Complete the Visit Form-30 in the normal manner and enter the code Lead in "National Emphasis Program," Item No. 28, when a visit has been made and findings are appropriate to the NEP (potential or actual lead exposures have been found).

XIV. Full Service Program Support.

- A. For states that have enacted requirements for mandatory reporting of elevated blood lead levels, the Area or Regional Office should contact the state agencies responsible for these programs and request information on workplace exposures associated with elevated blood lead levels. Regional and Area Offices are strongly encouraged to develop alliances, memoranda of understanding, or other agreements which will forge cooperative relationships and result in information sharing with the state's Departments of Health and/or Labor.
- B. During the course of this renewal REP the Area Director will continue to ensure that an outreach program will remain in effect during the enforcement phase of the program. Outreach activities will be directed to reach as many stake holders in the Area Office's jurisdiction as is practicable. Stakeholder such as members of the ASSE, AIHA, representatives from industries listed in Appendix A, and Chambers of Commerce, will be notified and the purpose of the outreach will be to inform interested parties of the existence, purpose and objectives of this emphasis program as well as promote employer knowledge and employee awareness of the hazards and acceptable methods of abatement to prevent illness and injuries. The method of outreach is at the Area Director's discretion and can consist of one or more of the following components:
 1. Broadcast mail-outs or program information.
 2. Stakeholder meetings.
 3. Targeted training sessions.
 4. Presentations to the affected group(s).
 5. Media press release or e-blast
- C. The Directorate of Science, Technology and Medicine has prepared materials which will be of assistance in this outreach effort. A variety of online resources can be accessed through OSHA's public webpage, www.osha.gov. There is a technical link page specific to lead under the alphabetical "Site Index". Also included to provide additional assistance (as Appendix B) in this document are **medical surveillance flow charts**.
