Ogden Atlantic Design, Poughkeepsie, NY; Notice of Affirmative Determination Regarding Application for Reconsideration

By letter of May 30, 1996, the petitioners requested administrative reconsideration of the Department of Labor's Notice of Negative Determination Regarding Eligibility for Workers of Ogden Atlantic Design to Apply for NAFTA-Transitional Adjustment Assistance. SUPPLEMENTARY INFORMATION:**I. Background**

Description: To meet many of OSHA's program needs, OSHA is proposing to continue their data initiative to collect occupational injury and illness data and information on number of workers employed and number of hours worked from establishments in portions of the private sector. OSHA will collect data from 80,000 employers with 50 or more employees in selected high hazard industries, selected employers who have had OSHA interventions in 1994, 1995 or 1996, and employers who are to be involved in the agency Cooperative Compliance Program (CCP). These data will allow OSHA to calculate occupational injury and illness rates and to focus its efforts on individual workplaces with ongoing serious safety and health problems. Successful implementation of the data collection initiative is critical to OSHA's reinvention efforts and the data requirements tied to the Government Performance and Results Act (GPRA).

II. Current Actions

This notice requests an extension of the current OMB approval of the paperwork requirements for the OSHA Data Collection Initiative. Extension is necessary to endure that the Agency continues to obtain establishment data necessary to carry on with the development and expansion of the New OSHA. This will allow the Agency to deal with a larger number of employers without massive increases in resources, will reduce intrusive interventions in workplaces that are relatively safe, and will lead to improved workplace safety and health for America's workers. In addition, OSHA will be able to proceed with its GPRA requirements to monitor the results of agency activities, quantify and evaluate the successes and failure of its various programs based on program results, identify the most efficient and effective program mix, and promote the
