Discrepancies noted by the review team during the on-site review were addressed by NSF following the on-site evaluation and are included in the on-site review report (see Exhibit 3).

Following a review of the application file and the on-site review report, the NRTL Program staff has concluded that the applicant can be granted recognition as a Nationally Recognized Testing Laboratory for the Ann Arbor, Michigan facility, subject to the conditions described above. The staff therefore recommended to the Assistant Secretary that the application be preliminarily approved.

Based upon the recommendation of the staff, the Assistant Secretary has made a preliminary finding that NSF International Ann Arbor, Michigan facility can meet the recognition requirements, as prescribed by 29 CFR 1910.7, for the 3 standards and the 3 programs described above with the condition to be applied as noted.

All interested members of the public are invited to supply detailed reasons and evidence as to whether NSF International Ann Arbor, Michigan facility can meet the recognition requirements, as prescribed by 29 CFR 1910.7, for the 3 standards and the 3 programs described above with the condition to be applied as noted.

The Assistant Secretary's final decision on whether the applicant (NSF) satisfies the requirements for recognition as an NRTL will be made on the basis of the entire record including the public submissions and any further proceedings that the Assistant Secretary may consider appropriate in accordance with 29 CFR Section 1910.7, and Appendix A to that section.

Signed at Washington, D.C. this 18th day of August, 1998.

Charles N. Jeffress, Assistant Secretary.

[FR Doc. 98–23251 Filed 8–27–98; 8:45 am]
programs and procedures listed below, all subject to certain conditions. Pursuant to the authority in 29 CFR 1910.7, the recognition of SGS is hereby renewed and expanded, subject to those conditions. This recognition is limited to equipment or materials that, under 29 CFR Part 1910, require testing, listing, labeling, approval, acceptance, or certification, by a Nationally Recognized Testing Laboratory. The recognition is further limited to equipment or materials that will be used in environments under OSHA's jurisdiction.

Renewal of NRTL Recognition

The recognition of the SGS Los Angeles, California site is renewed for testing and certification of equipment included within the scope of the following 16 test standards, which OSHA has determined are appropriate within the meaning of 29 CFR 1910.7(c):

- ANSI/UL 1 Flexible Metal Conduit
- ANSI/UL 3 Flexible Nonmetallic Tubing for Electrical Wiring
- ANSI/UL 250 Household Refrigerators and Freezers
- ANSI/UL 514A Metallic Outlet Boxes, Electrical
- UL 544 Electric Medical and Dental Equipment
- ANSI/UL 632 Electrically Actuated Transmitters
- ANSI/UL 751 Vending Machines
- ANSI/UL 913 Intrinsically Safe Apparatus and Associated Apparatus for Use in Class I, II, and III, Division I, Hazardous (Classified) Locations
- ANSI/UL 1012 Power Supplies
- UL 1236 Electric Battery Chargers
- UL 1270 Radio Receivers, Audio Systems, and Accessories
- ANSI/UL 1418 Implosion-Protected Cathode-Ray Tubes for Television-Type Appliances
- UL 1459 Telephone Equipment
- ANSI/UL 1484 Residential Gas Detectors
- ANSI/UL 1571 Incandescent Lighting Fixtures
- UL 1604 Electrical Equipment for Use in Class I and II, Division 2 and Class III Hazardous (Classified) Locations

Expansion of Recognition—Additional Facility

The recognition of SGS is expanded to include the Fairfield, New Jersey site for testing and certification of equipment included within the scope of the following 5 test standards, which OSHA has determined are appropriate within the meaning of 29 CFR 1910.7(c):

- ANSI/UL 94 Tests for Flammability of Plastic Materials for Parts in Devices and Appliances
- ANSI/UL 1950 Information Technology Equipment Including Electrical Business Equipment
- UL 2601-1 Medical Electrical Equipment, Part 1: General Requirements for Safety
- UL 3101-1 Electrical Equipment for Laboratory Use; Part 1: General Requirements
- UL 3111-1 Electrical Measuring and Test Equipment, Part 1: General

Expansion of Recognition—Programs and Procedures

The recognition of SGS is expanded to include use of the following 2 additional programs and procedures, based upon the criteria as detailed in OSHA's March 9, 1995 Federal Register notice (60 FR 12980). An NRTL may use these programs and procedures (collectively, programs) to control and audit, but not actually to generate, the data relied upon for product certification. An applicant, when initially recognized as an NRTL, is automatically accredited for the first, or basic, program, which requires that all product testing and evaluation be performed in-house by the NRTL that will certify the product. In addition to the requirements detailed in the previously cited March 9, 1995 Federal Register (60 FR 12980):

a. SGS U.S. Testing Company Inc., Fairfield, New Jersey, will review and approve the qualifications of all external organizations prior to SGS U.S. Testing Company Inc. accepting test data from these organizations.

b. SGS U.S. Testing Company Inc., Fairfield, New Jersey, will review and approve the qualifications of all external organizations prior to SGS U.S. Testing Company Inc. using a site of any of these organizations for witnessed test data.

Other Conditions

SGS U.S. Testing Company Inc. must also abide by the following conditions of the recognition, in addition to those already required by 29 CFR 1910.7:

- OSHA shall be allowed access to SGS' facility and records for purposes of ascertaining continuing compliance with the terms of its recognition and to investigate as OSHA deems necessary;

If SGS has reason to doubt the efficacy of any test standard it is using under this program, it shall promptly inform the test standard developing organization of this fact and provide that organization with appropriate relevant information upon which its concerns are based;

- SGS shall not engage in or permit others to engage in any misrepresentation of the scope or conditions of its recognition. As part of this condition, SGS agrees that it will allow no representation that it is either a recognized or an accredited Nationally Recognized Testing Laboratory (NRTL) without clearly indicating the specific equipment or material to which this recognition is tied, or that its recognition is limited to certain products;

- SGS shall inform OSHA as soon as possible, in writing, of any change of ownership or key personnel, including details;

- SGS will continue to meet the requirements for recognition in all areas where it has been recognized; and

- SGS will always cooperate with OSHA to assure compliance with the spirit as well as the letter of its recognition and 29 CFR 1910.7.

Charles N. Jeffress, Assistant Secretary.
