**DATES:** Submit written comments on or before August 5, 2002.

**ADDRESSES:** Submit written comments to the Docket Office, Docket No. ICR–1218–0217(2002), OSHA, U.S. Department of Labor, Room N–2625, 200 Constitution Avenue, NW., Washington, DC 20210; telephone: (202) 693–2350. #### **SUPPLEMENTARY INFORMATION:**

##### **I. Background**

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an

opportunity to comment on proposed and continuing information-collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and cost) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information-collection burden is correct.

Paragraph (k)(3)(i) of this Standard requires a prominent display of adequate warning signs against the use of mobile transmitters. If the signs are infeasible, an alternative method needs to be developed to prevent premature detonation.

## II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information-collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and cost) of the information-collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information-collection and -transmission techniques.

## III. Proposed Actions

OSHA proposes to extend OMB's previous approval of the recordkeeping (paperwork) requirement specified in paragraphs (k)(3)(i) of the Blasting Operation Standard for Construction (29 CFR 1926.900). The Agency will summarize the comments submitted in response to this notice, and will include this summary in its request to OMB to extend the approval of this information-collection requirement.

*Type of Review:* Extension of currently approved information-collection requirements.

*Title:* Blasting Operations.

*OMB Number:* 1218-0217.

*Affected Public:* Business or other for-profit; not-for-profit institutions; Federal government; State, local or tribal governments.

*Number of Respondents:* 160.

*Frequency of Response:* On Occasion.

*Total Responses:* 160.

*Average Time per Response:* 8 hours.

*Estimated Total Burden Hours:* 1,280.

*Estimated Cost (Operation and Maintenance):* \$1,704,000.

## IV. Authority and Signature

John L. Henshaw, Assistant Secretary of Labor for Occupational Safety and Health, directed the preparation of this notice. The authority for this notice is the Paperwork Reduction Act of 1995 (44 U.S.C. 3506) and Secretary of Labor's Order No. 3-2000 (65 FR 50017).

**ACTION:** Request for comment.

**SUMMARY:** OSHA solicits comment concerning its proposal to extend OMB approval of the information-collection requirements specified by its general industry Derricks Standard (29 CFR 110.181). The purpose of each of these requirements is to prevent employees from using derricks beyond their rated load and capacity and from using unsafe ropes, thereby, reducing their risk of death or serious injury caused by a derrick component or rope failure.

**DATES:** Submit written comments on or before August 5, 2002.

**ADDRESSES:** Submit written comments to the Docket Office, Docket No. ICR-1218-0222(2002), OSHA, U.S. Department of Labor, Room N-2625, 200 Constitution Avenue, NW., Washington, DC 20210; telephone: (202) 693-2350. ## SUPPLEMENTARY INFORMATION:

### I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information-collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and cost) is minimal, collection instruments are understandable, and OSHA's estimate of the information-collection burden is correct.

The Derricks Standard specifies two paperwork requirements. The following sections describe who uses the information collected under each requirements, as well as how they use it. The purpose of these requirements is to prevent death and serious injuries to employees by ensuring that the derrick is not used to lift loads its rated capacity and that all the ropes are inspected for wear and tear.

- *Marking the Rated Load (paragraph (c)).* Paragraph (c)(1) requires that for permanently installed derricks a clearly legible rating chart be provided with each derrick and securely affixed to the derrick. Paragraph (c)(2) requires that for non-permanent installations, the manufacturer provide sufficient information from which capacity charts can be prepared by the employer for the particular installation. The capacity charts must be located at the derrick or at the jobsite office. The data on the capacity charts provide information to the employees to assure that the derricks are used as designed and not overloaded or used beyond the range specified in the charts.

- *Certification Records of Rope Inspections (paragraph (g)).* Paragraph (g)(1) requires employers to thoroughly inspect all running rope in use, and to do so at least once a month. In addition, before using rope which has been idle for at least a month, it must be inspected as prescribed by paragraph (g)(3) and a record prepared to certify that the
