SUPPLEMENTARY INFORMATION:

I. Submission of Comments on This Notice and Internet Access to Comments and Submissions

You may submit comments in response to this document by (1) hard copy, (2) FAX transmission (facsimile), or (3) electronically through the OSHA webpage. Please note that you cannot attach materials such as studies or journal articles to electronic comments. If you have additional materials, you must submit three copies of them to the OSHA Docket Office at the address above. The additional materials must clearly identify your electronic comments by name, date, subject and docket number so we can attach them to your comments. Because of security-related problems there may be a significant delay in the receipt of comments by regular mail. Please contact the OSHA Docket Office at (202) 693–2350 for information about security procedures concerning the delivery of materials by express delivery, hand delivery and message service.

II. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burdens, conducts a pre-clearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA–95) (44 U.S.C. 3506(c)(2)(A)). OSHA will be requesting approval from the Office of Management and Budget (OMB) for certain information collection requirements contained in the Temporary Labor Camps Standard (29 CFR 1910.142). This notice initiates the process for OSHA to request OMB approval. The purpose of the Temporary Labor Camps Standards is to eliminate the incidence of communicable disease among temporary labor camp residents. The Standard requires camp superintendents to report immediately to the local health officer (1) the name and address of any individual in the camp known to have or suspected of having a communicable disease or suspected food poisoning, or (2) an unusual prevalence of any illness in which fever, diarrhea, sore throat, vomiting or jaundice is a prominent symptom.

III. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

• Whether the proposed collection of information is necessary for the proper performance of the Agency’s functions, including whether the information will have practical utility;

• The accuracy of the Agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used, especially the number of temporary labor camps in the United States; and

• The quality, utility, and clarity of the information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

IV. Proposed Actions

OSHA proposes to extend OMB’s approval of the collection of information requirements specified in 5 CFR
The application requested approval of the subject transfer of the license and a conforming license amendment pursuant to 10 CFR 50.80 and 50.90. Notice of the requests for approval and an opportunity to request a hearing or submit written comments was published in the Federal Register on June 14, 2002 (67 FR 40972). The Commission received no requests for hearing or written comments. Under 10 CFR 50.80, no license, or any right thereunder, shall be transferred, directly or indirectly, through transfer of control of the license, unless the Commission shall give its consent in writing. After reviewing the information submitted in the application and other information before the Commission, and relying upon the representations and agreements contained in the application, the Nuclear Regulatory Commission (NRC) staff has determined that FPLE Seabrook is qualified to be the holder of the license to the extent proposed in the application, and that the transfer of the license to FPLE Seabrook is otherwise consistent with applicable provisions of law, regulations, and orders issued by the Commission, subject to the conditions set forth below. The NRC staff has further found that the application for the proposed license amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission’s rules and regulations set forth in 10 CFR Chapter I; the facility will operate in conformity with the application, the provisions of the Act, and the rules and regulations of the Commission; there is reasonable assurance that the activities authorized by the proposed license amendment can be conducted without endangering the health and safety of the public and that such activities will be conducted in compliance with the Commission’s regulations; the issuance of the proposed license amendment will not be inimical to the common defense and security or the health and safety of the public; and the issuance of the proposed license amendment will be in accordance with 10 CFR part 51 of the Commission’s regulations and all applicable requirements have been satisfied. The findings set forth above are supported by the staff’s safety evaluation dated October 25, 2002.

III

Accordingly, pursuant to sections 161b, 161i, and 184 of the Atomic Energy Act of 1954, as amended, 42 U.S.C. 2201(b), 2201(i), and 2234; and 10 CFR 50.80, it is hereby ordered that...
