### DEPARTMENT OF LABOR

**Occupational Safety and Health Administration (OSHA), Labor.**

**Agency Information Collection Activities: Announcement of Office of Management and Budget (OMB) Control Numbers Under the Paperwork Reduction Act**

**AGENCY:** Occupational Safety and Health Administration (OSHA), Labor.

**ACTION:** Announcement of OMB approval of information collection requirements.

**SUMMARY:** The Occupational Safety and Health Administration (OSHA) announced that the Office of Management and Budget (OMB) has extended its approval for a number of information collection requirements found in certain sections of 29 CFR parts 1910, 1915, and 1926. OSHA sought approval under the Paperwork Reduction Act of 1995 (PRA—95), and, as required by that Act, is announcing the approval numbers and expiration dates for those requirements.

**EFFECTIVE DATE:** These amendments are effective May 23, 2003.

**FOR FURTHER INFORMATION CONTACT:** Todd Owen or Theda Kenney, Directorate of Standards and Guidance, Occupational Safety and Health Administration, U.S. Department of Labor, Room N—3609, 200 Constitution Avenue, NW., Washington, DC 20210, telephone (202) 693–2222.

**SUPPLEMENTARY INFORMATION:** In a series of Federal Register notices, the Agency announced its requests to OMB to renew its current extensions of approvals for various information collection (paperwork) requirements in its safety and health standards for General Industry, Shipyard Employment, and Construction. In these Federal Register announcements, the Agency provided 60-day comment periods for the public to respond to OSHA’s burden hour and cost estimates.

In accordance with PRA—95 (44 U.S.C. 3501–3520), OMB renewed its approval for these information collection requirements and assigned OMB control numbers to those requirements. The table below provides the following information for each of these OMB-approved requirements: The title of the collection; the date of the Federal Register notice, the Federal Register Reference (date, volume, and leading page); OMB’s control number; and the new expiration date.

Also, in accordance with the PRA 95 (44 U.S.C. 3507(d) and 5 CFR 1320.11), OSHA submitted 12 revised ICRs to OMB for approval when the Agency published the Standards Improvement Project—Phase II: Proposed Rule on October 31, 2002 (67 FR 66494). OSHA will resubmit these ICRs to OMB as revisions if changes are made based on public comments on the Standards Improvement Project—Phase II (SIPs) proposed rule. The SIPs ICRs in the following Table may either be identified by the publication date of October 31, 2002, or by Docket Number S–778–A.

| Title                                                                 | Date of Federal Register publication, Federal Register reference, and OSHA docket no. | OMB Control No. | Expiration date |
|-----------------------------------------------------------------------|-----------------------------------------------------------------------------------------|----------------|----------------|---|

*Note: OMB Control Numbers are assigned to Federal agencies to ensure that they report their burden hour and cost estimates to the Office of Management and Budget.*

**NUCLEAR REGULATORY COMMISSION**

**Docket No. 50–293**

**Entergy Nuclear Generation Company, Entergy Nuclear Operations, Inc.; Notice of Partial Withdrawal of Application for Amendment to Facility Operating License**

The U.S. Nuclear Regulatory Commission (NRC or Commission) has granted the request of Entergy Nuclear Operations, Inc. (Entergy), to withdraw a portion of its January 23, 2003, application for amendment to Facility Operating License No. DPR–35 for the Pilgrim Nuclear Power Station, located in Plymouth County, Massachusetts. The licensee’s application was supplemented by letters dated February 24 and April 17, 2003. The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the Federal Register on March 18, 2003 (68 FR 12952). However, by letter dated April 17, 2003, the licensee withdrew a portion of the original amendment request pertaining to the proposed change to note (1) of Technical Specification (TS) Table 3.2.B.

The Commission issued License Amendment No. 200 on April 22, 2003, which revised the TSs pertaining to requirements for the emergency core cooling system during shutdown conditions. The change modified the core spray and low pressure injection system’s TS requirements to be applicable during the Run, Startup, and Hot Shutdown Modes. The change also modified the high drywell pressure instrumentation TSs to require the instrumentation to be Operable during the Run, Startup and Hot Shutdown Modes. Unnecessary TS requirements were removed based on the plant’s operating Mode. Other changes were administrative in nature.

For further details with respect to this action, see the application for amendment dated January 23, 2003, as supplemented February 24, 2003; and the licensee’s April 17, 2003, letter that withdrew a portion of the application for license amendment. Documents may be examined, and/or copied for a fee, at the NRC’s Public Document Room (PDR), located at One White Flint North,
