

constitute a fundamental part of the production of an article. It has also been determined that this production and a meaningful portion of plant support activities were shifted to Mexico, thus leading to plant employment declines during the relevant period.

This certification is limited to the workers of the company listed on the first page of the petition as "the company division or subdivision of the subject (affected) workers": Delphi Automotive Systems Corporation, Delphi Delco Electronics Division, Body and Security Team, Oak Creek, Wisconsin. This petition does not cover the workers of Manpower Professional, an unaffiliated firm of the subject firm.

On page two of their petition the petitioners identified Manpower Professional as a "primary firm affected by NAFTA." However, Manpower Professional supplied personnel to Delphi's Oak Creek facility and therefore was not a "primary firm." Manpower Professional did not supply components, unfinished, or semifinished goods to Delphi's Oak Creek facility, nor did they assemble or finish products made by Delphi's Oak Creek facility.

Conclusion

After careful review of the additional facts obtained on remand, I conclude that there was a shift in production from the workers' firm to Mexico of articles that are like or directly competitive with those produced by the subject firm. In accordance with the provisions of the Trade Act, I make the following certification:

All workers of Delphi Automotive Systems Corporation, Delphi Delco Electronics Division, Body and Security Team, Oak Creek, Wisconsin who became totally or partially separated from employment on or after January 3, 2001, through two years from the issuance of this revised determination, are eligible to apply for NAFTA-TAA under section 250 of the Trade Act of 1974.

Signed at Washington, DC this 17th day of June 2003.

Elliott S. Kushner,

Certifying Officer, Division of Trade Adjustment Assistance.

SUPPLEMENTARY INFORMATION:

I. Background

To meet many of OSHA's program needs, OSHA is proposing to continue its data initiative to collect occupational injury and illness data and information on the number of workers employed and the number of hours worked from establishments in portions of the private sector and from some state and local government agencies. OSHA will collect calendar year 2002 data from up to 109,000 employers already required to create and maintain records pursuant to 29 CFR part 1904. These data will allow OSHA to calculate occupational injury and illness rates and to focus its efforts on individual workplaces with ongoing serious safety and health problems. Successful implementation of the data collection initiative is critical to OSHA's outreach and enforcement efforts and the data requirements tied to the Government Performance and Results Act (GPRA).
