cause death or serious physical harm, and to comply with occupational safety and health standards issued by the Secretary of Labor. In order to determine whether employers are providing safe and healthful workplaces, OSHA conducts unannounced workplace inspections as part of the Agency’s overall enforcement strategy. Of the approximately 35,000 inspections OSHA conducts in a year, about 3,000 are Site-Specific Targeting (SST) inspections. The remaining inspections are imminent danger, fatality, catastrophe, complaint, referral, follow-up, and other programmed inspections. The other programmed inspections are mainly Emphasis Program inspections, which focus on a particular safety or health hazard (e.g., amputation, silica), or the hazards of a specific industry (e.g., logging, nursing homes).

Since 1996, OSHA has been using the annual OSHA Data Initiative survey to collect data from employers in an effort to better identify worksites for inspection. The Data Initiative gives OSHA a targeting tool it did not previously have: the ability to determine each surveyed worksite’s Lost Work Day Injury and Illness (LWDII) rate. Prior to the Data Initiative, OSHA targeted its enforcement efforts based on the experience of individual employers. OSHA would not know until it arrived at an employer’s facility whether the employer had a high injury-illness rate or not, only that the employer was in a high-risk industry. It was thought that using site-specific data would be a better approach. Therefore, in early 1996, the Data Initiative was established to give OSHA the capability to focus on those establishments with serious safety and health problems. The Data Initiative survey was initially sent to establishments that had 60 or more employees, but since 1999 the data surveys have been sent to establishments with 40 or more employees. Each year, OSHA sends its data survey form (the “OSHA Work-Related Injury and Illness Data Collection Form”) to approximately 80,000 non-construction establishments, requesting from each employer (1) the average number of employees who worked for the employer during the prior calendar year, (2) the total hours the employees worked during the prior year, and (3) the summary injury and illness data from the employer’s OSHA Log form.

With the Data Initiative in place, in April 1999 OSHA implemented its first nationwide site-specific targeting plan (known as the SST) for comprehensive programmed inspections in non-construction worksites. This program applies only to Federal jurisdiction states and has also been updated annually. For the most current SST go to OSHA’s Web site at http://www.osha.gov and click on D in the alphabet at the top of the page, then Directives, then Information Date, and finally 2004, and scroll down to April and the current SST.

The SST inspection plans are based on the self-reported injury and illness information submitted by employers in OSHA’s Data Initiative. An LWDII rate is selected that will provide the number of establishments for SST inspections that OSHA anticipates it will be able to conduct during the year. From the data submitted, OSHA compiles two inspection targeting lists, a primary and a secondary list of non-construction worksites. The primary list for 1999 included the establishments that reported an LWDII at or above 16.0, which provided approximately 2,200 establishments for inspection. In 2000, and until 2004, the LWDII cut off was at or above 14.0, which provided 3,000 to 4,200 establishments. Each Federal OSHA Area Office receives a list of establishments for their primary targeting list, and is expected to complete inspections of these establishments in about a year. After an area office completes its primary list, the secondary list is used. The secondary list for 1999 included establishments that reported an LWDII of 10.0 or greater (but less than 16.0). In 2000, and until 2004, the secondary list...
The intention of the SST and the Data Initiative is to help OSHA make more effective use of its enforcement resources. In order to achieve OSHA’s goal of reducing the number of injuries and illnesses that occur at individual worksites/establishments, the SST directs enforcement resources to those worksites where the highest rate of injuries and illnesses have occurred. OSHA seeks input from the public in order to determine more accurately how its annual nationwide targeting program is accomplishing its goal of effectively directing OSHA’s enforcement resources. Any suggestions that would assist the Agency in improving the SST are welcome, as well as any information as to how the SST program is perceived by the employer and worker communities. Specifically: Are the LWDII/DART rate and the DAFWII case rate appropriate measurement tools for the SST? Should OSHA consider other measures for injury and illnesses at individual establishments? If yes, what measures should be considered? Should OSHA be looking at injury and illness data over multiple years rather than in a single year? Should an establishment’s priority for inspection take into account whether the establishment is in an industry with a high rate or a low rate of citations? Should the SST include additional focuses such as on specific industries, or past citation history? Are there particular areas/hazards OSHA should be focusing its enforcement efforts on?

Authority: This document is issued under Sec. 8(a) and 8(b), Pub. L. 91-596, 84 Stat. 1599 (29 U.S.C. 657). Signed in Washington, DC, this 27th day of April, 2004.

John L. Henshaw, Assistant Secretary of Labor.

BILLING CODE 4510-26-P

OFFICE OF PERSONNEL MANAGEMENT

Submission for OMB Review; Comment Request for Reclearance of an Expiring Information Collection Declaration for Federal Employment Optional Form 306, OMB No. 3206–0182

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104–13), this notice announces that the Office of Personnel Management submitted to the Office of Management and Budget a request for clearance of an expiring information collection. The OF 306, Declaration for Federal Employment is completed by applicants who are under consideration for Federal employment.

It is estimated that 474,000 individuals will respond annually. Each form takes approximately 15 minutes to complete. The annual estimated burden is 118,500 hours.

For copies of this proposal, contact Mary Beth Smith-Toomey on (202) 606–8356, Fax (202) 418–3251 or e-mail to mbtoomey@opm.gov. Please be sure to include a mailing address with your request.

DATES: Comments on this proposal should be received within 30 calendar days from the date of this publication.

ADDRESSES: Send or deliver comments to:

Kathy Dillaman, Deputy Associate Director, Center for Federal Investigative Services, U.S. Office of Personnel Management, 1900 E Street, NW., Room 5416, Washington, DC 20415;

and Joseph F. Lackey, OPM Desk Officer, Office of Information & Regulatory Affairs, Office of Management and Budget, New Executive Office Building, NW., Room 10235, Washington, DC 20503.
