

Additionally, Section 21(d) of the Act instructs the Secretary to “establish and support cooperative agreements with the States under which employers subject to the Act may consult with State personnel with respect to the application of occupational safety and health requirements under the Act or under State plans approved under section 18 of the Act.” This gives the Secretary authority to enter into agreements with the States to provide onsite consultation services, and established rules under which employers may qualify for an inspection exemption. To satisfy the intent of these and other sections of the Act, OSHA codified the terms that govern cooperative agreements between OSHA and State governments whereby State agencies provide onsite consultation services to private employers to assist them in complying with the requirements of the OSH Act. The terms were codified as the Consultation Program regulations (29 CFR Part 1908).

The Consultation Program regulations specify services to be provided, and practices and procedures to be followed by the State Onsite Consultation Programs. Information collection requirements set forth in the Onsite Consultation Program regulations are in two categories: *State Responsibilities* and *Employer Responsibilities*. Eight regulatory provisions require information collection activities by the State. The Federal government provides 90 percent of funds for onsite consultation services delivered by the States, which result in the information collection. Four requirements apply to employers and specify conditions for receiving the free consultation services.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency’s functions, including whether the information is useful;
- The accuracy of OSHA’s estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA proposes to extend the Office of Management and Budget’s (OMB)

approval of the collection of information (paperwork) requirements necessitated by Onsite Consultation Agreements (29 CFR 1908). In its extension request, OSHA also is proposing to increase the total burden hours for these requirements from 17,530 hours to 21,771 hours. The Agency will include this summary in its request to OMB to extend the approval of the collection of information requirements.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)).

This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657).

On January 5, 2005, OSHA published the Standards Improvement Project—Phase II, Final rule (70 FR 1112). The final rule removed and revised provisions of standards that were outdated, duplicative, unnecessary, or inconsistent and clarified or simplified regulatory language. The final rule

contained a revision to allow employers the option to either post employee exposure-monitoring results or notify individually, instead of allowing only individual notification. The changes reduced paperwork burden hours while maintaining worker protection and improving consistency among standards. The burden hour reduction was taken in the previous ICR.

The information collection requirements specified in the Cotton Dust Standard (29 CFR 1910.1043) protect employees from the adverse health effects that may result from their exposure to Cotton Dust. The major information collection requirements of the Cotton Dust Standard include: Performing exposure monitoring, including initial, periodic, and additional monitoring; notifying each employee of their exposure monitoring results either individually in writing or by posting; implementing a written compliance program; and establishing a respiratory protection program in accordance with OSHA's Respiratory Protection Standard (29 CFR 1910.134).

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA proposes to extend the Office of Management and Budget's (OMB) approval of these collection of information (paperwork) requirements necessitated by the Cotton Dust Standard (29 CFR 1910.1043). The Agency will include this summary in its request to OMB to extend the approval of these collection of information requirements.

Type of Review: Extension of currently approved information collection requirements.

Title: Cotton Dust Standard.

OMB Number: 1218-0061.

Affected Public: Business or other for-profits; Federal Government; State, Local or Tribal Government.

Frequency: On occasion.

Average Time Per Response: Varies from 5 minutes (.08 hour) to maintain a required record to two hours to conduct exposure monitoring.

Estimated Total Burden Hours: 70,340.

Estimated cost (Operation and Maintenance): 6,526,315.
