Under the authority granted by the Act, OSHA published the PSM Standard at 29 CFR 1910.119. The Standard, rather than setting specific engineering requirements, emphasizes the application of documented management controls; using the controls, companies address the risk associated with handling or working near highly hazardous chemicals. The Standard contains a number of paperwork requirements such as developing written process safety information, procedures and management practices, to update operating procedures and safe work practices, to evaluate safety history and policies of contractors, to conduct

periodic evaluations, and to document employee training.
