SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the Act) authorizes information collection by employers as necessary or appropriate for enforcement of the Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657).

The principal paperwork provisions of the Formaldehyde Standard require employers to perform exposure monitoring to determine employees' exposure to Formaldehyde, notify employees of their Formaldehyde exposures, provide medical surveillance to employees, provide examining physicians with specific information, ensure that employees receive a copy of their medical examination results, maintain employees' exposure

monitoring and medical records for specific periods, and provide access to these records by OSHA, the National Institute for Occupational Safety and Health, the affected employees, and their authorized representatives.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of the Agency's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting OMB to extend its approval of the information collection requirements contained in the Formaldehyde Standard, including an increase of 28,664 burden hours. The Agency will summarize the comments submitted in response to this notice, and will include this summary in the request to OMB.

Type of Review: Extension of currently approved information collection requirement.

Title: Formaldehyde Standard (29 CFR 1910.1048).

OMB Number: 1218-0145.

Affected Public: Business or other for-profits.

Number of Respondents: 112,638.

Frequency: On occasion, semi-annually, annually.

Total Responses: 1,903,049.

Average Time per Response: Time per response ranges from 5 minutes for employers to maintain exposure monitoring and medical records for each employee to 1 hour for employees to receive a medical examination.

Estimated Total Burden Hours: 519,076 hours.

Estimated Cost (Operation and Maintenance): \$55,325,688.
