

(3) The smoke from a smoke source below the flight deck and passenger cabin must not rise above armrest height on the main deck.

(4) The smoke from a source on the same level as the flight deck and passenger cabin must dissipate rapidly via dilution with fresh air and be evacuated from the airplane. A procedure must be included in the Airplane Flight Manual to evacuate smoke from the occupied areas of the airplane. In order to demonstrate that the quantity of smoke is small, a flight test must be conducted which simulates the emergency procedures used in the event of a fire during flight, including the use of V_{mo}/M_{mo} descent profiles and a simulated landing, if such conditions are specified in the emergency procedure.

2. Requirement for fire detection in electrical/electronic equipment bays:

(a) A smoke or fire detection system compliant with §§ 25.858 and 25.855 must be provided that will detect fire/smoke within each electrical/electronic equipment bay.

(b) Each system must provide a visual indication to the flight deck within one minute after the start of a fire in an electrical/electronic equipment bay.

(c) Airplane flight tests must be conducted to show compliance with these requirements, and the performance of the smoke or fire detectors must be shown in accordance with guidance provided in the latest version of Advisory Circular 25-9, or other means acceptable to the FAA.

(d) A procedure to shut down all non-essential systems in the electrical/electronic equipment bays following a smoke detection in any electrical/electronic equipment bay must be included in the Airplane Flight Manual.

Electronic copies of this **Federal Register** notice, as well as news releases and other relevant documents, are available at OSHA's homepage at <http://www.osha.gov>.

SUPPLEMENTARY INFORMATION: OSHA published the proposed Confined Spaces in Construction Standard on November 28, 2007 (72 FR 67351). The period for submitting written comments was to expire on January 28, 2008, but was extended to February 28, 2008 (73 FR 3893). During this comment period, a number of commenters (*see, e.g.*, Exs. OSHA–2007–0026–0024.1, –0026, –0030.1, –0032, –0027, –0032, –0057) requested an informal public hearing. With this notice, OSHA is granting these requests.

Public Participation—Comments and Hearings: OSHA encourages members of the public to participate in this rulemaking by providing oral testimony and documentary evidence at the informal public hearing. Accordingly, the Agency invites interested parties having knowledge of, or experience with, the issues raised in the NPRM to participate in this process, and welcomes any pertinent data that will provide the Agency with the best available evidence to use in developing the final rule. This section describes the procedures the public must use to schedule an opportunity to deliver oral testimony and to provide documentary evidence at the informal public hearing.

Hearing Arrangements. Pursuant to section 6(b)(3) of the Occupational Safety and Health Act (the Act; 29 U.S.C. 655), members of the public have an opportunity at the informal public hearing to provide oral testimony concerning the issues raised in the NPRM. An administrative law judge (ALJ) will preside over the hearing, and will resolve any procedural matters relating to the hearing on the first day.

Purpose of the Hearing. The legislative history of Section 6 of the Act, as well as the Agency's regulation governing public hearings (29 CFR 1911.15), establish the purpose and procedures of informal public hearings. Although the presiding officer of the hearing is an ALJ, and questions by interested parties are allowed on pertinent issues, the hearing is informal and legislative in purpose. Therefore,

the hearing provides interested parties with an opportunity to make effective and expeditious oral presentations in the absence of procedural restraints that could impede or protract the rulemaking process. The hearing is not an adjudicative proceeding subject to the technical rules of evidence. Instead, it is an informal administrative proceeding convened for the purpose of gathering and clarifying information. The regulations that govern the hearing, and the pre-hearing guidelines issued for the hearing, will ensure that participants are treated fairly and have due process. This approach will facilitate the development of a clear, accurate, and complete record. Accordingly, application of these rules and guidelines will be such that questions of relevance, procedures, and participation will be decided in favor of developing a complete record.

Conduct of the Hearing. Conduct of the hearing will conform to the provisions of 29 CFR 1911.5. Although the ALJ presiding over the hearing makes no decision or recommendation on the merits of the NPRM or the final rule, the ALJ has the responsibility and authority to ensure that the hearing progresses at a reasonable pace and in an orderly manner. To ensure that interested parties receive a full and fair informal hearing, the ALJ has the authority and power to: regulate the course of the proceedings; dispose of procedural requests, objections, and similar matters; confine the presentations to matters pertinent to the issues raised; use appropriate means to regulate the conduct of the parties who are present at the hearing; question witnesses, and permit others to question witnesses; and limit the time for such questions. At the close of the hearing, the ALJ will establish a post-hearing comment period for parties who participated in the hearing. During the first part of this period, the participants may submit additional data and information to OSHA, and during the second part of this period, they may submit briefs, arguments, and summations.

Notice of intention to appear to provide testimony at the informal public hearings. Hearing participants must file a notice of intention to appear that provides the following information: The name, address, and telephone number of each individual who will provide testimony; the capacity in which the individual will testify (*e.g.*, name of the establishment/organization the individual is representing; the individual's occupational title and position); approximate amount of time requested for the individual's testimony; specific issues the individual will

address, including a brief description of the position that the individual will take with respect to each of these issues; and any documentary evidence the individual will present, including a brief summary of the evidence.

OSHA emphasizes that, while the hearing is open to the public and interested parties are welcome to attend, only a party who files a proper notice of intention to appear may ask questions and participate fully in the hearing. A party who did not file a notice of intention to appear may be allowed to testify at the hearing if time permits, but this determination is at the discretion of the presiding ALJ.

Hearing Testimony and Documentary Evidence. OSHA will review each submission and determine if the information it contains warrants the amount of time requested. OSHA then will allocate an appropriate amount of time to each presentation, and will notify the participants of the time allotted to their presentations. Prior to the hearing, the Agency will notify the participant if the allotted time is less than the requested time, and will provide the reasons for this action. OSHA may limit to 10 minutes the presentation of any participant who fails to comply substantially with these procedural requirements. The Agency also may request a participant to return for questions at a later time.

Certification of the record and final determination after the informal public hearing. Following the close of the hearing and post-hearing comment period, the ALJ will certify the record to the Assistant Secretary of Labor for Occupational Safety and Health. This record will consist of all of the written comments, oral testimony, documentary evidence, and other material received during the hearing. Following certification of the record, OSHA will review the proposed provisions in light of all the evidence received as part of the record, and then will issue the final determinations based on the entire record.
