Notice of Lodging of Consent Decree Under the Clean Air Act; the Clean Water Act; the Resource Conservation and Recovery Act; the Emergency Planning and Community Right-To-Know Act; and the Comprehensive Environmental Response, Compensation, and Liability Act

Notice is hereby given that on October 8, 2010, a proposed Consent Decree in *United States and State of Missouri v. The Doe Run Resources Corporation, et al.*, Civil Action 4:10-cv-1895 was lodged with the United States District Court for the Eastern District of Missouri.

In this action the United States and the State of Missouri sought civil penalties and injunctive relief for environmental violations of the Clean Air Act, 42 U.S.C. 7401-7671q; the Missouri Air Conservation Law, Chapter 643, RSMo; the Resource Conservation and Recovery Act, 42 U.S.C. 6901-6992k; the Missouri Hazardous Waste Management Law, §§ 260.350-260.434, RSMo; the Clean Water Act, 33 U.S.C. 1251-1387; the Missouri Clean Water Law, Chapter 644, RSMo; the

Emergency Planning and Community Right-to-Know Act, 42 U.S.C. 11001-11050; and the Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S.C. 9601-9603 at several of the mining, milling, and smelting facilities located in Missouri owned and operated by The Doe Run Resources Corporation, The Doe Run Resources Corporation d/b/a "The Doe Run Company", and The Buick Resource Recycling Facility, LLC ("Defendants"). To resolve the United States' and State's claims the Defendants will pay a civil penalty of \$7 million. The penalty will be paid in a \$3.5 million payment to the United States and a \$1.5 million payment to the state of Missouri, with an additional \$1 million plus interest to be paid to the state each year for the next two years. The settlement also requires Doe Run to establish financial assurance trust funds for the cleanup of the following active or former mining and milling facilities: Brushy Creek, Buick, Fletcher, Sweetwater, Viburnum, and West Fork. Doe Run will also take steps to address RCRA violations at certain facilities; finalize and come into compliance with more stringent Clean Water Act permits at 10 of its facilities, including Herculaneum, Glover, Brushy Creek, Buick Mill, Fletcher, Sweetwater, Viburnum, West Fork, Mine #35 (Casteel), and Buick Resource Recycling; and will spend an estimated \$5.8 million on stream mitigation activities along 8.5 miles of Bee Fork Creek, an impaired waterway near Doe Run's Fletcher mine and mill facility. At four facilities, Buick Mine, Brushy Creek, Fletcher, and Sweetwater, Doe Run will also enclose the lead concentrate handling, loading, and storage areas under negative pressure with emissions routed to a baghouse. The company will also spend \$2 million on community mitigation projects over the next four years.

In addition, instead of installing pollution control technologies needed to reduce sulfur dioxide and lead emissions as required by the Clean Air Act, Doe Run has made a business decision to shut down its lead smelter in Herculaneum, Mo., by Dec. 31, 2013. The company will also provide an initial \$8.14 million in financial assurance to guarantee cleanup work at the Herculaneum facility.

The Department of Justice will receive for a period of 30 days from the date of this publication comments relating to the Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and either e-mailed to pubcomment-ees.enrd@usdoj.gov or

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

Paragraph (f)(1)(iii) of the Standard requires the employer to assure that operating and maintenance instructions are available on machines or in the area where the machine is being operated. Paragraph (g)(3) requires the employer to assure that operating and maintenance instructions are available in each vehicle.

Paragraph (i)(1) of the Standard requires employers to provide training for each employee, including supervisors. To meet this requirement, employers must conduct the training at the frequencies specified by paragraph (i)(2). Paragraph (i)(3) specifies that a worker's/supervisor's training must consist of the following elements: Safe work practices, including the use, operation, and maintenance of tools, machines, and vehicles the worker/supervisor uses or operates, as well as procedures, practices, and requirements of the employer's worksite; recognition and control of health and safety hazards associated with the worker's/supervisor's specific work tasks and

logging operations in general; and the requirements of the Standard.

Paragraph (i)(10)(i) specifies that employers must verify that they are in compliance with the training requirements in paragraph (i). This certification must be in writing and provide the following information: The name/identifier of the worker/supervisor; the date(s) of the training; and either the signature of the employer or the individual who conducted the training. Paragraph (i)(10)(ii) requires employers to maintain the most recent certification for training completed by an employee/supervisor.

Training workers/supervisors in safe work practices and to recognize and control the safety and health hazards associated with their work tasks and overall logging operations enables them to prevent serious accidents by using specific procedures and equipment in a safe manner to avoid or to control dangerous exposures to these hazards.

Establishing and maintaining written certification of the training that each worker/supervisor has received (*i.e.*, job and first aid) assures the employer that the training specified by the Standard has been conducted, and at the required frequencies. With regard to first-aid training, the certification assures that the worker's/supervisor's training certificate is currently valid. In addition, these records provide the most efficient means for an OSHA compliance officer to determine whether an employer performed the required training at the necessary and appropriate frequencies.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend its approval of the information collection requirements contained in the Standard on Logging Operations (29 CFR 1910.266). The Agency is requesting to decrease its existing

burden hours from 31,286 hours to 25,957 for a total decrease of 5,329 hours. This decrease is the result of updated data which shows a decrease in the number of logging establishments. The Agency will summarize the comments submitted in response to this notice and will include this summary in the request to OMB.

Type of Review: Extension of a currently approved collection.

Title: Logging Operations (29 CFR 1910.266).

OMB Number: 1218-0198.

Affected Public: Business or other for-profits.

Number of Respondents: 10,038.

Frequency of Recordkeeping: Initially, on occasion.

Average Time per Response: Varies from 1 minute (.02 hour) to maintain training certification records to 3 hours to conduct initial training.

Estimated Total Burden Hours: 25,957.

Estimated Cost (Operation and Maintenance): \$0.
