SUPPLEMENTARY INFORMATION:

1. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3506(c)(2)(A)).

This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The Standard entitled "Occupational Exposure to Hazardous Chemicals in Laboratories" (29 CFR 1910.1450; the "Standard") applies to laboratories that use hazardous chemicals in accordance with the Standard's definitions for "laboratory use of hazardous chemicals" and "laboratory scale." The Standard requires these laboratories to maintain worker exposures at or below the permissible exposure limits specified for the hazardous chemicals in 29 CFR part 1910, subpart Z. They do so by developing a written Chemical Hygiene Plan (CHP) that describes: Standard operating procedures for using hazardous chemicals; hazard-control techniques; equipment-reliability measures; worker information-and-training programs; conditions under which the employer must approve operations, procedures, and activities before implementation; and medical consultations and examinations. The CHP also designates personnel responsible for implementing the CHP, and specifies the procedures used to provide additional protection to workers exposed to particularly hazardous chemicals.

Other information collection requirements of the Standard include: Documenting exposure monitoring results; notifying workers in writing of these results; presenting specified information and training to workers; establishing a medical surveillance program for overexposed workers; providing required information to the physician; obtaining the physician's written opinion on using proper respiratory equipment; and, establishing, maintaining, transferring, and disclosing exposure monitoring and medical records. These collection of information requirements, including the CHP, control worker overexposure to hazardous laboratory chemicals, thereby preventing serious illnesses and death among workers exposed to such chemicals.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions to protect workers, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is proposing to extend the information collection requirements contained in the Occupational Exposure to Hazardous Chemicals in Laboratories Standard (29 CFR 1910.1450). The Agency is requesting to increase the existing burden hour estimate for the collection of information requirements in the Standard. In this regard, the Agency is requesting to adjust the current burden hour estimate from 281,419 hours to 293,706 hours.

Type of Review: Extension of currently approved collections.

Title: Occupational Exposure to Hazardous Chemicals in Laboratories.

OMB Number: 1218-0131.

Affected Public: Business or other for-profits.

Number of Respondents: 48,461.

Frequency: Varies from 3 minutes (.05 hour) to replace the safe practice manual to 1 hour to develop a new manual.

Total Responses: 948,634.

Average Time per Response:
Annually; monthly, quarterly, semi-
annually, on occasion

Estimated Total Burden Hours:
293,706

Estimated Cost (Operation and
Maintenance): \$41,271,276.
