SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The collections of information contained in the Standard include a written exposure control plan, documentation of workers' hepatitis B

vaccinations and post-exposure evaluations and follow-up medical visits, training, related recordkeeping and a sharps injury log. Information generated in accordance with these provisions provides the employer and the worker with means to provide protection from the adverse health effects associated with occupational exposure to bloodborne pathogens.

As required by the Paperwork Reduction Act of 1995 (the PRA) (44 U.S.C. 3506(c)(2)(A)), OSHA published a notice in the **Federal Register** on December 8, 2010 (75 FR 76492, Docket No. OSHA-2010-0047) requesting public comment on its proposed extension of the information collection requirements contained in the existing Standard on Bloodborne Pathogens (the Standard; 29 CFR 1910.1030). The notice was part of a preclearance consultation program intended to provide those interested parties the opportunity to comment on OSHA's request for an extension by the Office of Management and Budget (OMB) of a previous approval of the information collection requirements in the Standard. The Agency received three comments on the proposed extension.

However, as a result of the SIP-III final rule published on June 8, 2011 (76 FR 33590), the "transfer of records" requirement contained in the Standard (formerly 29 CFR 1910.1030(n)(4)(ii)) was revoked. In accordance with the PRA, prior to issuance of the final rule, OSHA submitted a revised ICR to OMB on May 27, 2011, requesting approval to remove this requirement. There were no burden hours and costs associated with this provision. On August 11, 2011, OMB issued a Notice of Action (NOA) indicating approval of the request.

The NOA instructed OSHA to publish a second notice in the **Federal Register** to solicit comments on its proposal to extend OMB's approval of the information collection requirements. In response to the NOA, the Agency is publishing a second **Federal Register** notice requesting comments on the revised ICR. The Agency will respond to any previous or new comments submitted on the proposed extension and submit the final ICR to OMB.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions to protect workers, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the

information collection requirements, including the validity of the methodology and assumptions used;

- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend its approval of the information collection requirements contained in the Bloodborne Pathogens Standard (29 CFR 1910.1030). The Agency is requesting that it retain its current estimate of 14,518,778 burden hours. The Agency will summarize the comments submitted in response to this notice and will include this summary in the request to OMB.

Type of Review: Extension of a currently approved collection.

OMB Number: 1218-0180.

Number of Respondents: 666,933.
