SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accord with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 USC 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act, or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657).

The Standard specifies several paperwork requirements. The following sections describe who uses the information collected under each

requirement, as well as how they use it. The purpose of each of these requirements is to prevent workers from using unsafe cranes and ropes, thereby reducing their risk of death or serious injury caused by a crane or rope failure during material handling.

(A) Inspection of and Certification Records for Cranes (§ 1910.180(d)(4) and (d)(6))

Paragraph 1910.180(d) specifies that employers must prepare a written record to certify that the monthly inspection of critical items in use on cranes (such as brakes, crane hooks, and ropes) has been performed. The certification record must include the inspection date, the signature of the person who conducted the inspection, and the serial number (or other identifier) of the inspected crane. Employers must keep the certificate readily available. The certification record provides employers, workers, and OSHA compliance officers with assurance that critical items on cranes have been inspected, and that the equipment is in good operating condition so that the crane and rope will not fail during material handling. These records also enable OSHA to determine that an employer is complying with the Standard.

(B) Rated Load Tests (§ 1910.180(e)(2))

This provision requires employers to make available written reports of load-rating tests showing test procedures and confirming the adequacy of repairs or alterations, and to make readily available any rerating test reports. These reports inform the employer, workers, and OSHA compliance officers of a crane's lifting limitations, and provide information to crane operators to prevent them from exceeding these limits and thereby causing crane failure.

(C) Inspection of and Certification Records for Ropes (§ 1910.180(g)(1) and (g)(2)(ii))

Paragraph (g)(1) requires employers to thoroughly inspect any rope in use at least once a month. The authorized person conducting the inspection must observe any deterioration resulting in appreciable loss of original strength and determine whether or not the condition is hazardous. Before reusing a rope that has not been used for at least a month because the crane housing the rope is shut down or in storage, paragraph (g)(2)(ii) specifies that employers must have an appointed or authorized person inspect the rope for all types of deterioration. Employers must prepare a certification record for the inspections required by paragraphs (g)(1) and

(g)(2)(ii). These certification records must include the inspection date, the signature of the person conducting the inspection, and the identifier for the inspected rope; paragraph (g)(1) states that employers must keep the certificates "on file where readily available," while paragraph (g)(2)(ii) requires that certificates "be . . . kept readily available." The certification records assure employers, workers, and OSHA that the inspected ropes are in good condition.

(D) Disclosure of Crane and Rope Inspection Certification Records

The disclosure of certification records provides the most efficient means for OSHA compliance officers to determine that an employer is complying with the Standard.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend its approval of the collection of information requirements contained in the General Industry Standard on Crawler, Locomotive, and Truck Cranes (29 CFR 1910.180). The Agency is not requesting any adjustments in the burden hours of the paperwork requirements contained in 29 CFR 1910.180 for the Crawler, Locomotive, and Truck Cranes Standard, and is requesting that it be allowed to retain its previous estimate of 30,452 burden hours.

Type of Review: Extension of a currently approved information collection.

Title: Crawler, Locomotive, and Truck Cranes (29 CFR 1910.180).

OMB Control Number: 1218-0221.

Affected Public: Business or other for-profits; Federal Government; State, Local, or Tribal government.

Number of Respondents: 3,499.

Frequency of Responses: On occasion; Monthly, Semi-annually.

Average Time per Response: Varies from 5 minutes (.08 hour) to disclose certification records to 1 hour to conduct rated load tests.

Estimated Total Burden Hours: 30,452.

Estimated Cost (Operation and Maintenance): \$0.

IV. Public Participation-Submission of Comments on This Notice and Internet Access to Comments and Submissions

You may submit comments in response to this document as follows:

- (1) Electronically at <http://www.regulations.gov>, which is the Federal eRulemaking Portal; (2) by facsimile (fax); or (3) by hard copy. All comments, attachments, and other material must identify the Agency name and the OSHA docket number for this ICR (Docket No. OSHA-2010-0015). You may supplement electronic submissions by uploading document files electronically. If you wish to mail additional materials in reference to an electronic or facsimile submission, you must submit them to the OSHA Docket Office (see the section of this notice titled **ADDRESSES**). The additional materials must clearly identify your electronic comments by your name, date, and the docket number so the Agency can attach them to your comments.

Because of security procedures, the use of regular mail may cause a significant delay in the receipt of comments. For information about security procedures concerning the delivery of materials by hand, express delivery, messenger, or courier service, please contact the OSHA Docket Office at (202) 693-2350, (TTY) (877) 889-5627.

Comments and submissions are posted without change at <http://www.regulations.gov>. Therefore, OSHA cautions commenters about submitting personal information such as social security numbers and dates of birth. Although all submissions are listed in the <http://www.regulations.gov> index, some information (e.g., copyrighted material) is not publicly available to read or download through this Web site.

All submissions, including copyrighted material, are available for inspection and copying at the OSHA Docket Office. Information on using the <http://www.regulations.gov> Web site to submit comments and access the docket is available at the Web site's "User Tips" link. Contact the OSHA Docket Office for information about materials not available through the Web site, and for assistance in using the Internet to locate docket submissions.
