SUPPLEMENTARY INFORMATION:

On November 8, 2013, OSHA published a proposed rule to revise its regulation on Occupational Injury and Illness Recording and Reporting (Recordkeeping) (78 FR 67254). The proposal would amend the recordkeeping regulations to add requirements for the electronic submission of injury and illness information employers are already required to keep under OSHA’s regulations for recording and reporting occupational injuries and illnesses. The proposal set a February 6, 2014 deadline for submitting written comments.

OSHA has received a request from the National Association of Home Builders (NAHB) to extend the comment period

an additional 90 days. NAHB’s reasons for requesting an extension include the overlap with the proposed crystalline silica rulemaking, which will also affect the construction industry. Further, the request stated that informing home builders and coordinating their responses will take time and effort beyond the 90 days provided.

OSHA has decided to extend the deadline for submitting comments to March 8, 2014, which provides stakeholders an additional 30 days. The extension ensures that stakeholders will have a full 120 days to submit comments, which OSHA believes is adequate for this limited rulemaking. The extension also ensures that stakeholders who attend the January 9, 2014, public meeting on the proposed rule will have an opportunity to incorporate into their comments their views on relevant information presented at the meeting.
