

regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSHA Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

Under the paperwork requirements specified by paragraph (c) of the Standard, an employer must certify that his or her workers have been trained as specified by the training provision of the Standard. Specifically, employers must prepare a certification record which includes the identity of the person trained, the signature of the employer or the person who conducted the training, and the date the training was completed. The certification record shall be prepared at the completion of training and shall be maintained on file for the duration of the employee's employment. The information collected will be used by employers as well as by compliance officers to determine whether employees have been trained according to the requirements set forth in 29 CFR 1910.268(c).

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend its approval of the information collection requirements contained in the Standard on Telecommunications (29 CFR 1910.268). The burden hours have decreased based on the reduced number of telecommunication workers installing and repairing lines and equipment. Therefore, OSHA is proposing to decrease the existing burden hour estimate for the collection of information requirements specified by the Standard from 1,077 hours to 664 hours, a total decrease of 413 hours. The Agency will summarize the comments

submitted in response to this notice and will include this summary in the request to OMB.

Type of Review: Extension of a currently approved collection.

Title: Telecommunications (29 CFR 1910.268).

OMB Control Number: 1218-0225.

Affected Public: Business or other for-profits.

Number of Respondents: 558.

Frequency of Responses: On occasion.

Average Time per Response: Two minutes (.03 hour) for an establishment to disclose training records and two minutes (.03 hour) for the training record to be generated.

Estimated Total Burden Hours: 664.

Estimated Cost (Operation and Maintenance): \$0.
