SUPPLEMENTARY INFORMATION: This ICR seeks to extend PRA authority for the Methylene Chloride (MC) Standard information collection. The purpose of the Standard and its information collection requirements, codified at 29 CFR 1910.1052, is to protect workers from the adverse health effects that may result from their exposure to MC. The requirements in the Standard include: Worker exposure monitoring, notifying workers of their MC exposures, administering medical examinations to workers, providing examining physicians with specific program and worker information, ensuring that workers receive a copy of their medical examination results, maintaining workers' exposure monitoring and medical examination records for specific periods, and providing access to these records to affected workers and their authorized representatives. OMB authorization for an ICR cannot be for more than three (3) years without renewal, and the current approval for this collection is scheduled to expire on March 31, 2015. The DOL seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing requirements. The DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on December 4, 2014 (79 FR 72030).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section by April 30, 2015.
