

5. An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond: The 2023 and 2025 ASJ will collect data from approximately 940 jails (see table 1). For each data collection cycle, we estimate an average burden of 80 minutes for the updated survey form CJ-5. If needed, jail respondents will be contacted by email or telephone to verify data quality issues. We estimate that data quality follow-up is needed for 70% of the jails (658) in each cycle and will run an average of 10 minutes for each jail. In addition, we estimate that 10% of the jails (94) in each cycle will be contacted to verify point-of-contact information, which takes 5 minutes each on average. In total, the ASJ will incur a burden estimate of 1,371 hours, or 88 minutes per respondent, each year in 2023 and 2025. These estimates are based on previous estimates of item burden and input received from participants in the 2018 jail collection cognitive test (generic OMB clearance, Control No. 1121-0249).

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of the continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, the collection instruments are clearly understood, and OSHA’s estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary

duplication of effort in obtaining information (29 U.S.C. 657).

Section 7(c)(1) of the Occupational Safety and Health Act (*i.e.*, “the OSH Act” or “the Act”) authorizes the Secretary of Labor to, “with the consent of any State or political subdivision thereof, accept and use the services, facilities, and personnel of any agency of such State or subdivision with reimbursement.” Section 21(c) of the Act authorizes the Secretary of Labor to “consult with and advise employers and workers . . . as to effective means of preventing occupational illnesses and injuries.” To satisfy the intent of these and other sections of the Act, the Occupational Safety and Health Administration (OSHA) codified the terms that govern cooperative agreements between OSHA and State governments or U.S. Territories whereby State agencies and U.S. Territories provide On-Site Consultation services to private sector, small business employers to assist them in complying with the requirements of the Act. The terms were codified as the On-Site Consultation Program regulations (29 CFR part 1908).

OSHA’s Compliance Assistance Authorization Act of 1998 (CAAA) amended Section 21 of the OSH Act by adding paragraph (d), authorizing the Secretary of Labor to enter into agreements with the States and U.S. Territories to provide On-Site Consultation services, and established rules under which employers may qualify for an inspection exemption. To achieve the intent of the CAAA, OSHA published a final rule to amend 29 CFR part 1908. The rule became effective on December 26, 2000. The On-Site Consultation Program regulations specify services to be provided, as well as practices and procedures to be followed by the State On-Site Consultation programs. The Federal government provides 90 percent of funds for On-Site Consultation services.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the agency’s functions to protect workers, including whether the information is useful;
- The accuracy of OSHA’s estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for

example, by using automated or other technological information collection, and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB approves the new information collection requirements contained in the PSM On-Site Consultation Agreements. The agency is requesting that OMB approves 26,766 burden hours for this collection.

OSHA will summarize the comments submitted in response to this notice and will include this summary in the request to OMB to extend the approval of the information collection requirements.
