

registration form requires that the new user applicant provide information on their job specialization and affiliation and can be accessed through the button labeled “New User (other than federal OSHA).”

The OSHA Office of Training and Education uses the collected job specialization and affiliation information to sort reporting data quarterly, especially total student attendance, student attendance by each offered course, and student demographics and job affiliations (e.g., safety, health, and whistleblower investigator job titles).

The agency uses the information collected under the “Course Information,” “Personal Data,” and “Employer Data” to identify private sector students so that it can collect tuition costs from them or their employers as authorized by 31 U.S.C. 9701 (“Fees and Charges for Government Services and Things of Value”); Office of Management and Budget Circular A–25 (“User Charges”); and 29 CFR part 1949 (“Office of Training and Education, Occupational Safety and Health Administration”). The information in the “Personal Data” and “Emergency Contacts” categories permits OSHA to contact students if an emergency arises at their home, place of employment, or local accommodations, and to alert supervisors/alternate contacts of a trainee’s injury or illness.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the agency’s functions to protect workers, including whether the information is useful;
- The accuracy of OSHA’s estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection, and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend the approval of the information collection requirements contained in the Student Data Form. The agency is also requesting a decrease in the burden hour estimate of 166 hours (from 333 hours to 167 hours). This reduction is a result of decreased student enrollments

in Institute courses because of the ongoing COVID–19 pandemic.

OSHA will summarize the comments submitted in response to this notice and will include this summary in the request to OMB to extend the approval of the information collection requirements.

Type of Review: Extension of a currently approved collection.

SUPPLEMENTARY INFORMATION.

FOR FURTHER INFORMATION CONTACT:

Seleda Perryman or Theda Kenney, Directorate of Standards and Guidance, OSHA, U.S. Department of Labor, telephone (202) 693-2222.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of a continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance process to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, the reporting burden (time and costs) is minimal, the collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (see 29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with a minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of effort in obtaining information (see 29 U.S.C. 657).

The Respirable Crystalline Silica Standards for general industry (29 CFR 1910.1053), shipyards (29 CFR 1915.1053) and construction (29 CFR 1926.1153) contain the following information collection requirements: conducting worker exposure assessments and notifying workers of the assessment results and any corrective actions being taken; establishing, implementing, reviewing,

evaluating, and updating a written exposure control plan and making the plan available to workers and designated representatives; creating and submitting air quality permit notifications; establishing a respiratory protection program; providing qualitative fit-testing and maintaining records; providing medical surveillance to workers; providing the physician or other licensed health care provider (PLHCP), or the specialist, with specific information; ensuring that the PLHCP, or specialist, explains the results of the medical examination to the employee and provides each employee with a copy of their written medical report; obtaining a written medical opinion from the PLHCP, or specialist, and ensuring that each employee receives a copy of the opinion; and making and maintaining air monitoring data, objective data, and medical surveillance records; and providing workers and designated representatives with access to these records. The records are used by workers, employers, and OSHA to determine the effectiveness of the employer's compliance efforts.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend its approval of the information collection requirements contained in the Respirable Crystalline Silica Standards for General Industry, Maritime and Construction. The agency is requesting an adjustment decrease of 4,672,138 burden hours (from 12,468,266 to 7,796,128). The requested adjustment decrease is associated with the agency now zeroing out the burden hours of initial exposure assessments and the initial medical examinations for existing employees; and employers completing their written exposure assessment and respirator programs. In addition, the burden for rule familiarization and other

one-time costs incurred within the first year was removed. Also, the agency is requesting an adjustment decrease of \$132,079,926 for operation and maintenance costs (from \$393,789,550 to \$261,709,624) to adjust for substantially decreased estimates of initial exposure assessments and initial medical examinations.

Type of Review: Extension of a currently approved collection.

Title: Respirable Crystalline Silica Standards for General Industry (29 CFR 1910.1053) and Shipyards (29 CFR 1915.1053) and Construction (29 CFR 1926.1153).

OMB Control Number: 1218-0266.

Affected Public: Business or other for-profits.

Number of Respondents: 764,318.

Frequency: Biennially, Once, On occasion, Quarterly, Semi-annually, Annually.

Average Time per Response: Various.

Estimated Number of Responses: 17,203,330.

Estimated Total Burden Hours: 7,796,128.

Estimated Cost (Operation and Maintenance): \$261,709,625.
