

standardized across states and some of the data is not accessible to the public.

MRS are currently collected in three-year cycles. The most current MRS data collection cycle reflects the years 2019 through 2021. Some states may have applied for waivers and conducted data collection or reporting activities in 2022 due to disruptions caused by the COVID-19 pandemic. This information collection would request MRS data for surveys conducted between 2019 and 2022 from all states and the District of Columbia. Data requested would have already been collected by each state to meet federal regulations; no new data collection obligation is created. The Department of Labor would reconcile measures for uniformity across the states and geography would be standardized at the county level to be able to combine these data for analysis with county characteristics that are publicly available from the American Community Survey. The resulting database (NDCP) would be evaluated to protect respondent confidentiality, implementing proper disclosure avoidance techniques in counties with small samples. The database would be made available to the public as a research tool to understand childcare prices at the county level and changes

in childcare prices over time. Section 2 of Public Law 66-259 that established the Women’s Bureau authorizes this information collection. See 29 U.S.C. 13.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6.

II. Desired Focus of Comments: This **Federal Register** Notice provides the opportunity to comment on the proposed data collection. The Department of Labor is particularly interested in comments that do the following:

- Evaluate whether the proposed collection of information is necessary for the proper performance functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency’s burden estimate of the

proposed information collection, including the validity of the methodology and assumptions;

- Enhance the quality, utility, and clarity of the information to be collected; and

- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology—for example, permitting electronic submissions of responses.

III. Current Actions: At this time, the Department of Labor is requesting clearance to request market rate survey data collected by the states and the District of Columbia between 2019 and 2022 to update the National Database of Childcare Prices.

Type of Review: Reinstatement with Change.

OMB Control Number: 1290-0025.

Affected Public: State, Local, and Tribal Governments.

Comments submitted in response to this request will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.
