SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of the
continuing effort to reduce
paperwork and respondent (i.e.,
employer) burden, conducts a
precollection consultation program to
provide the public with an opportunity
to comment on proposed and
continuing information collection
requirements in accordance with the
Paperwork Reduction Act of 1995 (PRA)
(44 U.S.C. 3506(c)(2)(A)). This program
ensures that information is in the
desired format, reporting burden (time
and costs) is minimal, the collection
instruments are clearly understood, and
OSHA’s estimate of the information
collection burden is accurate. The
Occupational Safety and Health Act of
1970 (OSH Act) (29 U.S.C. 651 et seq.)
authorizes information collection by
employers as necessary or appropriate
for enforcement of the OSH Act or for
developing information regarding the
causes and prevention of occupational
injuries, illnesses, and accidents (29
U.S.C. 657). The OSH Act also requires
that OSHA obtain such information with
minimum burden upon employers, especially those operating small
businesses, and to reduce to the
maximum extent feasible unnecessary
duplication of effort in obtaining

The following sections describe who
uses the information collected under
each requirement, as well as how they
use it. The purpose of these
requirements is to protect workers from
the health effects associated with
occupational exposure to cadmium.
Such exposure to cadmium may cause
lung cancer, prostate cancer,
nonmalignant respiratory disease, acute
pneumonitis, fever and chest pain,
severe weakness, coughing and
tightness of the chest, and kidney
disease.

II. Special Issues for Comment

OSHA has a particular interest in
comments on the following issues:
• Whether the proposed information
collection requirements are necessary
for the proper performance of the
agency’s functions to protect workers,
including whether the information is
useful;
• The accuracy of OSHA’s estimate of
the burden (time and costs) of the
information collection requirements,
including the validity of the
methodology and assumptions used;
• The quality, utility, and clarity of
the information collected; and
• Ways to minimize the burden on
employers who must comply; for
example, by using automated or other
technological information collection,
and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend
the approval of the information
collection requirements contained in the
Standard on Cadmium in General
Industries (29 CFR 1910.1027). The
agency is requesting an adjustment
increase of 42,230 (from 73,396 to
115,626 hours). This increase is a result
of a computational error discovered in
the last ICR. Additionally, OSHA is
requesting a decrease in the operation
and maintenance costs of $10,114 (from
$5,493,656 to $5,483,542). This decrease
is a result of a computational error
discovered in the last ICR.

OSHA will summarize the comments
submitted in response to this notice and
will include this summary in the
request to OMB to extend the approval of
the information collection
requirements.

Type of Review: Extension of a
currently approved collection.
