Five Ways to Stay Safe When Working on Chassis in Marine Terminals

1. Be aware of vehicle traffic patterns and conduct work in a protected area.

2. Disconnect and secure chassis from semi-tractors before performing maintenance or repairs.

3. Never position yourself under a jacked vehicle or equipment.

4. Follow safety procedures for bleeding pressure from charged brake cylinders before performing work or removing them.

5. Service single- and multi-piece rim wheels according to 29 CFR 1910.177 and 1917.44.
